Our readers may like to know how to keep butter hard without ice. Take a new earthen flower pot, wash it clean, wrap the outside of it in several thicknesses of wet cloth and set it over the dish containing the butter, where there will be a free current of air about it. This causes an evaporation of the water in the cloth and cools the butter.

-Heachache, costiveness, and piles, are easily and thoroughly cured by a judiciouse of Ayer's Pills. The Mahdi left four mothers-in-law. How under heaven he lived as long as

spotless. She was arch and full of spirits; but her humor, for she possessed it in abondance, was so artless, joyous and innocent, that the heart was taken before one had time for reflection. On the morning in question Mabel stood outside her father's snug thatched cottage. The trim hedge, the grass-plot before the door, the little flower-bed, the woodbine trained up against the wall and hanging its blossoms about the lattice, the pot of flowers in the windows, all bespoke the taste and refinement of young Mabel's nature. By her side was her lover, young Shaun, or John O'Gorman. As was natural, and as they often did before under similar circumstances, each paused on meeting, but somehow on this occasion there was visible on both sides more restraint than either had ever yet shown. At length the silence was broken by Shaun.

What is Catarrh From the Mail (Can. Dec. 15. Catarrh is a muco-purulent discharge caused by the presence and development of the vege. table parasite amœba in the internal lining nembrane of the nose. This parasite is the simplest living form known that lives upon organs and is only developed under favorable circumstances, and these are: Morbid state of the blood, as the blighted corpuscle of circumstances, and these are: morbid state of the blood, as the blighted corpuscle of tubercle, the germ poison of syphilis, mercury, toxomoea, from the retention of the effect matter of the skin, suppression, perspiration, badly ventilated sleeping apartments, and other poisons that are germinated in the blood. These poisons keep the internal lining membrane of the nose in a constant state of irritation, ever feady for the deposit of the seeds of these germs, which spread up the nostrils and down the fauces, or back of the throat causing ulceration of the throat; up the enstachian tubes, causing deafness; burrowing in the vocal cords, causing hoarseness; usurping the proper structure of the bronchial tubes, ending in pulmonary consumption and death.

Many attempts have been made to discover a cure for this distressing disease by the use of inhalents and other ingenious devices, but none of these treatments can do a particle of good until the parasites are either destroyed or removed from the mucus tissue.

Some time since a well known physician of forty years standing, after much experimenting, succeeded in discovering the necessary combination of ingredients which never fail in absolutely and permanentlyeradicating this horrible disease, whether standing for one or forty years. Those who may be suffering from the above disease, should without delay, communicate with the business managers, Messrs. A. H. The Architect advises the alteration of my premises will be commenced in a few days and will occasion a great quantity of dust, etc. The Silk and Dress Departments being in close proximity to the workmen, I will make a tremendons sacrifice on all goods in these departments, so as to clear all out if possible. Notable Lines will be found in our Black Gros Grains, Surahs, Satins, Satin Merveilleux, Broches and Velvets. I will also clear at nominal prices all my Crapes, Cashmeres and Fancy Dress Goods. It will repay ladies to anticipate their wants and call during the week and inspect the stock, which shall be cheerfully shown, and no pressure to purchase Observe the address—
