JOHN R. PUDSEY, Manager.

WEDNESDAY, MAY 30TH, 1900. than in former years, and a good many apraying outfits are being actively operate is as it should be, for it is not until scientific ethods that the best results will be obtained in this branch of farming. Annapolis county as in general farming, and there is not the elightest reason for this unfortunate condition. When a large proportion of our population depend upon their farms for a living, for success in their calling. That hard manual labor, alone, on the farm, will produce the most desirable results is an exploded fallacy. A knowledge of the soil and the constituents required for the successful production of any crop is now considered necessary, and it is easy to obtain this knowledge by a study of the experiment station litera-ture which every farmer may obtain. In a ture which every farmer may obtain. In a few years the natural fertility and adaptability of this garden of the province will, no doubt, be fittingly utilized to the profit of 11-22. doubt, be fittingly utilized to the profit of the farmer and the fame of the country. To hasten this period there must be a complete awakening of the sleeping farmers, who are now producing crops on the ancient plans devised by their grandfathers, who had not problem in the light of the scientific investigations of the present day. More interest should be taken, particularly by young farmers, in the investigations at the horticulhere in our own locality a course at the

farmers, be of infinitely more value than a Kentville. university course. There is much to be years of unguided effort would never reveal. The government is subsidizing such institutions for the benefit of the farmers, and they should avail themselves of the privileges will make farming a congenial and profitable farming may readily be made one of the most profitable, as the ever increasing demands, stantial profit for all farm pi new methods of farming will add a dignity

some of the lessons prepared by the experimental stations, and to this end we shall in future publish many extracts from the farming literature, supplied by both Canadian and American stations. These articles, coming from such authorities, will be deserving of careful study, and we trust will prove both popular and valuable to our farmer friends.

| Architecture publish many extracts from the farming literature, supplied by both Canadian and American stations. These articles, complete the first they can burn during the season of careful study, and we trust will prove both popular and valuable to our farmer friends.

| Architecture publish many extracts from the farming literature, supplied by both Canadian and American stations. These articles, complete the manufacture of brick over a fortigist ago, and have advance orders for all the brick they can burn during the season and Mrs. Louis Morse, of Digby, are guests at the home of Mr. and Mrs. U. D. Lockett spent a few days last week in St. John.

Calkin, who has been principal of the Nova Scotia Normal School at Truro for over thirty years is about to resign and retire altogether from active work. tain her national integrity much longer, and but for jealousy among those nations that have large commercial interests in the great eastern empire, stronger hands would ere this have been resultation the affiliation of the sidewalks. castern empire, stronger hands would ere this have been regulating the affairs of that country. The outrages on foreign missions have become intolerable, and, as the United States may be considered as a free lance in the far east, interference from this quarter should prove effective without stirring up a broil between the nations of Europe now so carefully watching the movements of each other as they hover over a land of great promise that must soon be partitioned and opened to the influence of civilization and commerce.

—Medical science is just now making great preparations to combat the ravages of that dread disease consumption, and from the success that is attending the limited

that dread disease consumption, and from the success that is attending the limited treatment of the disease by modern methods, we judge that the effort now being made will basely them by years.

—The Dominion Atlantic Railway has issued its annual guide book to Nova Socia. The various points of interest along the line of the D. A. R. are well written up, and the parameter of th will largely abate the mortality resulting pamphlet contains beautiful half tone cuts of various points of interest. from the sickness. Throughout eastern Canada the medical fraternity, aided by the local governments and public generosity, are establishing sanitoriums for the scientific treatment of consumption. Nova Scotia will be in line, largely owing to the agitation prometed by Dr. A. P. Reid. Startling calculations are made as to the effectiveness of the new methods of treating the disease which culations are made as to the effectiveness of the new methods of treating the disease which up to within a few years had been considered practically incurable. Now there is hop for the consumptive, and a bright prospect for the stampingout of this dreadful affliction.

18 the business-like way of doing outsiess.

—G. O. Gates, of Truro, N. S., the practical piano and organs reviews will please address Bridgetown, Lawrencetown or Middleton post-offices. As he is manufacturers' agent for the sale of some of the leading makes of piano and organs, intending purchasers would do well to consult him.—10 3i

—An American consular agent, writing to his government, points out that Britain's colonies offer the best market for the future for the products of American industry. The more the British empire is developed, the better the opportunity of the American manufacturer, who has already found a profitable field in some lines in Egypt, India and Sputh

better the opportunity of the American manufacturer, who has already found a profitable field in some lines in Egypt, India and South Africa. Commenting on the consul's report the Toronto World makes the following argument in favor of a real preferential trade within the empire:

We are building up a great Empire at the cost of billions of money and the aerification of the trade that will be developed by federation and the extension of the Empire. While Great Britain is fully occupied in prosecuting the war is South Africa, Under our said did and the extension of the Empire. While Great Britain is fully occupied in on the ground in advance of any other nation, including curselves. Under our said did anations to get ahead of us and enjoys a preference in our own Empire. While we have the control of the plainthrophy business. The opps does not be provided that the legal to do business in Great Britain went out of the philanthrophy business. The opps does not be considered that the control of the Euclerian policy of limited exclusion control services and the extension of the Empire, which the United States is sending in its traveller to secure the trade. It is said to do business in Great Britain went out of the philanthrophy business. The opps does not be exceeded that the legal that the control of the Euclerian policy of limited exclusion countries seeking to do business in Great Britain went out of the Duniton House of Commons by which it is revealers. We are building an Empire, which the United States is over running with its fewerless. Wouldn't the more sensitive of the Euclerian that the control of the parish of St. James' in the Country of the Duniton House of Commons by which it is revealed and the countries shall be five oper cent. Now whenover on rate of interest is specified.

—A bill was introduced last week in the Dominion House of Commons by which it is revealed to the Country of th

Local and Special News.

—About two hundred members of Provid-nce and Boston cycling clubs are to wheel brough the province in August. Persons are warned against using bleycles on the sidewalks of the town. Any such misconduct noticed after publication of this notice will be punished.

If F. L. MILNER, Town Clerk,

OF THE D. A. R. AND YARMOUTH STEAMSHIP CO. BEFORE THE RAIL-WAY COMMITTEE.

was up before the Railway Committee of the Privy Council this morning, Hon. A. G. Blair, presiding. Mr. Chrysler, Q. C., for the Dominion Atlantic, argued that the tri bunal had no jurisdiction, as the preference, if any, was given by the Dominion Atlantic to themselves, the Dominion Atlantic steamers being part of the same company.

F. B. Wade, for the Yarmouth Steamship Company, argued that the steamer branch of the service was a third party, and that they had no right to give a preference. He was willing to consent to the new rates of the Dominion Atlantic Company, provided the Yarmouth Steamship Company were allowed to participate in them on the same basis as before the change of rates. He held that the D. A. R. Co. had no charter to run passenger steamers, and that the rates fixed

that the D. A. R. Co. had no charter to run passenger steamers, and that the rates fixed by the D. A. R. Co. had practically the effect of destroying the Yarmouth Steamship Company, and wiping them out of existence. The rates, he held, were illegal, and could not be enforced, as they were never authorized by the Governor-in-Council.

Mr. Blair remarked that, if the Yarmouth Company had any law on their side, the disposition would be to side with the underdog in the fight and not have the Yarmouth in the fight and not have the Yarmo Company, the originators of the service, an nihilated. The question of the jurisdiction Council was taken sub justice, and should it be in favor of the Yarmouth Company, a commission will be issued to Halifax to take evidence as to the accommodation, facilities, sufficiency of service, etc., afforded by the Yarmouth Company before the Dominion Atlantic entered the steamship business.
