

AN IDEAL TONIC FOR WEAK PEOPLE

Dr. Williams' Pink Pills Act Directly On the Blood and Nerves

Food is as important to the sick person as medicine, more so in most cases. A badly chosen diet may retard recovery. In health the natural appetite is the best guide to follow. In sickness the appetite is often fickle and depraved.

Proper food and a good tonic will keep most people in good health. Dr. Williams' Pink Pills are the most popular tonic medicine in the world, harmless and certain in their action, which is to build up the blood and restore the vitality of the run-down system. For growing girls who become thin and pale, tired women, and for old people who find their strength Dr. Williams' Pink Pills are an ideal tonic. Thousands of people have testified to the health-giving qualities of Dr. Williams' Pink Pills, and in many homes they are the only medicine used. Among the houses in which the benefit of this medicine has been proved is that of Mr. E. A. Underwood, Kingston, Ont., who says: "I have used Dr. Williams' Pink Pills with the most beneficial results. As the result of hard work I was very much run down, and my appetite was very poor. I got a supply of the pills which I used regularly for some weeks with the result that they restored me to my old time strength. They also proved a blessing to my daughter, who was in a very anaemic condition, and who seemed not to get more than temporary relief from any medicine until she took Dr. Williams' Pink Pills. She took the pills for about three months, and is now enjoying the best of health. For these reasons I can strongly recommend Dr. Williams' Pink Pills."

At the first sign that the blood is out of order take Dr. Williams' Pink Pills, and note the speedy improvement they make in the appetite, health and spirits. You can get these pills through any dealer in medicine or by mail at 50 cents a box or six boxes for \$2.50 from The Dr. Williams' Medicine Co., Brockville, Ont.

Want Canadian Goods

H. S. Arkell, Live Stock Commissioner, who has recently returned from a trip to Europe where he has reviewed the live stock market situation, has expressed his views regarding Canada's position, in the October number of the Agricultural Gazette. He states that the London agents of our Canadian packers reviewed in disappointment the orders for Canadian goods—bacon, eggs, etc.—for which they could obtain but a tenth of the product they required. The unwarranted high price of hogs in Canada during the past month is but a reflection on the reputation of Canadian bacon, as compared with American, and demonstrates the effort of our packers to maintain their connection with old established clients in the face of short supplies. Since Denmark, within a year, will again be a factor on the bacon market our only security for the future is full production and such a substantial export supply as must command recognition by its volume and quality. Short hog production is unquestionably the most dangerous policy Canada can adopt. This is true of eggs as well as bacon.

A REAL JESSE JAMES STUNT

CASPER, Nov. 20.—William Carlisle train bandit, walked into the Western Union office here today while scores of heavily armed men searched the surrounding country for him, and sent a telegram to the Union Pacific railroad office in Cheyenne, thanking the railroad for the money he secured from the passengers on the Los Angeles Limited train which he held up near Medicine Bow on Tuesday night.

Barraging houses drive a lot of their victims to matrimony.

Agriculture

Forcing Bulbs in the House

(Experimental Farms Note)

Bulbs when properly forced make splendid house plants and come into bloom during two of the winter months which most need the brightening effects of their rich colours. "Bulbs" is a general term which includes Narcissi, Early Tulips and the more recent Darwin Tulips noted for their elegance of form and range of rich colours.

After the bulbs have been potted the next essential is to induce an abundance of root growth as quickly as possible. The proper root development will determine the subsequent size, vigor and lasting qualities of the flowers. Explicit advice in this connection is, first, choose as the storage place for the pots the coolest, darkest and dampest part of the cellar or the vegetable storage room is very suitable. Second, provide a condition which approximates as nearly as possible the condition they would have if planted in the ground outside. One thorough watering at the time of potting may be sufficient, but in most cases it is not, therefore water regularly as often as the top soil shows signs of dryness. Another method is to plunge the pots into damp sand and keep the sand moist. Provided the place is not too cold, or they are not kept exceptionally wet, rooting will proceed satisfactorily, and towards the end of December the roots should begin to fill the pots. Third, after two months or ten weeks has elapsed bring the pots into a lighter place and water even more regularly and frequently. Allow them to make about three inches of growth and the growth to change to a good green colour then bring some of the pots into the full light and warmth. Very rapid and healthy growth should soon result.

A few words of advice as to what not to do. First, do not on any occasion place the pots too near the furnace or near the hot air outlets; dry, warm air is disastrous to healthy plant growth. It dries out the soil and hardens the roots; it stunts the foliage and shrivels up the blossoms. Second, do not over-water at any period; the soil should be kept always moist but never soggy and cold, and do not allow the plants to experience too violent temperature changes. At the time of rooting the temperature may range from 35 to 45 and after the plants are brought into the light it should range from 50 to 70. Higher temperatures during the day, due to combined insurance and sun heat, may not hurt the plants but they are apt to be materially injured if forced to experience several hours of dry, high temperature during the evening when they should enjoy the resting period always provided for them under natural conditions. Flowers with little or no stem and plants with a stunted growth are due to improper forcing methods. Bulbs appreciate the sunshine and when in the flowering stage also respond to and should have abundance of water.

F. E. BUCK, Assistant Horticulturist.

Testing Seed for Farmers and Merchants

The Dominion Seed Branch with laboratories at Ottawa, Winnipeg and Calgary reported over 35,000 seed tests for the year ending June 30th. The growth of seed testing in Canada is indicated from the fact that only 5,775 samples were reported in 1909. The great bulk of the work in our seed laboratories is done between September and June when each laboratory may handle up to 200 samples per day. Only ten samples are tested free of charge for any farmer or seed merchant during the season. Over this number, the service is charged for at cost.

Official seed testing is the basis of Government seed control, which in older European countries is rated as a leading Government service to Agriculture. Any country without an efficient system of seed control soon becomes the

dumping ground for inferior seeds from other countries, and low-grade homegrown seeds may be sold to unsuspecting farmers. Our system is frequently referred to in other countries as being the most practical and efficient. Its importance is now being better appreciated when it is required that imported seeds are not released from bond until they are approved at the seed laboratories, and when cereal grains, flax, corn, as well as clover and grass seeds, are marketed on the basis of fixed quality seed grade standards.

Canada's Agricultural Position

The Hon. S. F. Tolmie, Canada's new Minister of Agriculture, has summed up the outstanding facts of Canada's agricultural position in an article appearing in the November number of The Agricultural Gazette. He presents statistics showing the growth of Canada's financial burden during the past five years and points out means by which our national debt will be reduced. He says in part: "I am confident that this Dominion, through the development of her natural resources, will in time wipe out her debt. Forests, fisheries, and mines all contribute their part of the revenue but by far the greatest returns will be derived from agriculture which industry we must continue to establish in permanency and increase in magnitude. One of the greatest responsibilities that falls on either the federal or provincial departments of agriculture is the conservation of the great wealth that lies in the virgin soil. Innumerable considerations are involved in this one problem, but the whole affair can be accomplished if we engage in mixed farming with live stock as a basis. This is the fundamental principle underlying success in agriculture."

GENUINE ASPIRIN HAS "BAYER CROSS"

Tablets without "Bayer Cross" are not Aspirin at all

Get genuine "Bayer Tablets of Aspirin" in a "Bayer" package, plainly marked with the safety "Bayer Cross". The "Bayer Cross" is your only way of knowing that you are getting genuine Aspirin, prescribed by physicians for nineteen years and proved safe by millions for Headache, Neuralgia, Colds, Rheumatism, Lumbago, Neuritis, and Pain generally. Made in Canada. Handy tin boxes of 12 tablets—also larger sized "Bayer" packages. Aspirin is the trade mark (registered in Canada), of Bayer Manufacture of Monoacetic-acid-ester of Salicylic-acid. While it is well known that Aspirin means Bayer manufacture, to assist the public against imitations, the Tablets of Bayer Company, Ltd., will be stamped with their general trade mark, the "Bayer Cross".

A New Hullless Oat

(Experimental Farms Note)

The introduction of a good, new variety of hullless oats by the Experimental Farms Branch has not perhaps attracted as much attention as it should. Free samples of this variety are now being distributed by the Dominion Cerealist at Ottawa. The stock on hand is not large, but as long as it lasts samples will be gladly sent to farmers in almost any district of Canada, as it is believed that this oat will be widely useful. The full name of the variety is Liberty, Ottawa 480. It is derived from a cross made in 1903 between the well-known variety, Swedish Select, and a hullless oat from China. The new variety is decidedly superior to the old, Chinese sort. Thrashing out free from hull, this type of oat furnishes a concentrated product of extremely high value which has only to be ground in order to make most excellent feed especially for young pigs and chickens. When carefully enough cleaned for use as human food, it makes meal of surprisingly fine quality. The Liberty oat has very good field characters, being rather early in ripening and having reasonably stiff straw. The yield (so far as kernel is concerned) is equal to about seven-eighths of that of Banner oats. Farmers who are interested in the raising of hogs and chickens are strongly advised to give this new oat a trial. It has already proven extremely satisfactory in some districts.

C. E. SAUNDERS, Dominion Cerealist.

WAR HERO NOW GAINS 24 POUNDS

After Strain of Service Was Almost A Nervous Wreck—Praises Tanlac

Here is another instance of the remarkable reconstructive powers of Tanlac. William J. McCullum of 114 Broad St., St. John, New Brunswick who spent three and a half years at the front in France and Belgium, wounded five times, gassed and shell shocked and finally invalided home, states that Tanlac has put him in shape to where he is not only beginning to feel like himself again, but that he has also gained twenty four pounds in weight, besides.

Mr. McCullum is a veteran of two wars. He holds a medal for service in the great European war and also a four bar medal for gallantry in the Boer war.

"I can hardly realize just what Tanlac has done for me," said Mr. McCullum, in an interview, recently. "In restoring my health and putting me in shape. When I got home from the war I was simply a nervous wreck and neither time nor medicines seemed to do me any good. I was so nervous and shaky I could hardly hold a cup of tea to my mouth and if my wife happened to drop a fork or knife at the table I would nearly jump out of my chair. In this excited condition, my food could not digest, but would sour and form gas on my stomach adding more misery to the night, getting only about two hours restless sleep and would sometimes have to get out of bed and walk the floor. My condition was distressing in the extreme and seemed to be getting worse all the time."

"Finally someone suggested that I try Tanlac and I got a bottle, having little idea it would do me any good, but it has not only helped me, it has made me feel like a new man. I now have an appetite like a bear and eat just anything set before me without the least effect on it. I have been built up and strengthened until my nervousness is practically gone. I can sleep all night long like a log and my wife has a job waking me up in the mornings. I am now able to do a full day's work and Tanlac gets all the credit for me being on my feet. My nerves have steadied down until I can stand all sorts of noise and sudden jar. When I first began taking Tanlac I couldn't hold my hand steady enough to take a drink of water, but now I can shave myself. I am praising Tanlac to all the boys, especially those suffering like I was, take a tin from me get Tanlac, for I fully believe I would still be a nervous wreck if I had not taken it myself."

Tanlac is sold in Bridgetown by S. N. Wear, in Middleton by Clifford A. Munford and in Bear River by L. V. Harris.

Thrill In The Schools

Increasingly insistent is the demand that the schools of this Dominion teach citizenship—that they equip the child to do the full duty of a good citizen. It is not forgotten that the schools have for generations done excellent work; but the experience of the last four years has brought the realization that a change in method and in subject matter—a shifting of emphasis—is urgently required. A young man may be an expert in arithmetic, in spelling, in writing, grammar, geography, and every other subject on the curriculum and may, none the less, display qualities of brutality, injustice, wastefulness, and treason—may, indeed, be a bolshevik. An altered type of training, a new view of relative values, must come. A knowledge of the fundamentals on which rests the structure of democracy must be a part of all instruction worthy of the name. Education may make or mar a nation—it has done so in Europe and elsewhere.

What are the fundamentals? Honesty is one. Industry is another, and there are many more. Frugality is an important one, and one that is being overlooked in this new country. Canada was

built on thrift, among other things the pioneers were specialists in thrift. Thrift is not hoarding; it is not miserliness; it consorts not with the pessimist. Thrift is intelligent care of money and resources, conservation for the future, wise and thoughtful spending. The thrifty man is an optimist, for he has stored up power.

And thrift must be taught in the schools. This will not add to the teacher's burdens, for every subject of study can be so taught that it helps to inculcate the practice of thrift. A Thrift Club in the classroom works wonders in the discipline of the school; it gives the pupils something worth while to talk about and something worth while to think about. United for a common aim, they learn esprit de corps. They come to know the value of money and the principles of business; they are imbuing the necessary preparation for citizenship. For the attractive investment of small savings, War-Savings Stamps afford an excellent medium. This plan has been highly successful in the schools of Great Britain, of the United States, and of Canada.

Thrift taught in the schools encourages industry because children wish to earn so that they may save. And, more than ever in its history, this old world needs to go to work. Production must be increased. Produce, save, invest, must become the universal slogan.

CORRESPONDENCE

The Editor, Montreal Daily Star.

Sir, Your report of the visit of the Kiwanians to the Boys' Training School at Shawbridge is one more reminder of the possibilities of this institution.

I have no axe to grind in its favor. I am simply prompted to ask publicity for these lines because after spending a day with the superintendent and the boys, and comparing it with similar institutions in the United States which I have frequently inspected, the province of Quebec is to be congratulated upon having at Shawbridge a man inspired with a lofty and yet attainable ideal. The average reformatory aims at the inculcation of the principles of discipline, and frames its curriculum of drill and labor accordingly. Scholastic instruction follows conventional lines. Sports enter largely into the imagination of the youth. Technical studies are also encouraged, and results along these lines are on the whole gratifying.

At Shawbridge the aim of Mr. Barrass is to co-relate these to the highest of all attainments—the realization of nobility of character in its original significance. Barrass has, in my opinion, made the greatest sociological discovery on this Continent, and if he is provided with the facilities required to give effect to his dynamic, he will do more to revolutionize the thought of criminologists than either Warden Homer, just gone to his rest, or the late Dr. Farnardo or Muehler did. He may even impart a new interpretation of evangelization for the universal Church, and do something that will give the quietus to sensationalism in religion. A man with a contagious faith in God, allied to a love of scientific teaching and a practical, almost uncanny knowledge of human nature, and the boy mind in particular, Barrass is a rarity. It is an education to meet him.

A. M. NICOL.

THE FALL WEATHER HARD ON LITTLE ONES

Canadian fall weather is extremely hard on little ones. One day is warm and bright and the next wet and cold. These sudden changes bring on colds, cramps and colic and unless baby's little stomach is kept right the result may be serious. There is nothing to equal Baby's Own Tablets in keeping the little ones well. They sweeten the stomach, regulate the bowels, break up colds and make baby thrive. The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.
