## CUMBERLAND TRIUMPH.

This variety has received considerable attention since its introduction in 1874, by A. Miller, Carlisle, Penn. The plant is vigorous and hardy, and fairly productive, but by no means equal in this respect to the Wilson. The berries are large and uniform, and of a bright, light red color, and of fair quality, but too soft for shipping any distance. In many respects it resembles the variety raised by J. H. Biggar, of Drummondville, and named by him the

## NEW DOMINION.

This possesses all the good qualities of the Cumberland Triumph, and is at the same time more productive, of somewhat firmer flesh, and better flavor. It is a very showy, handsome fruit, of large size, very regularly formed, and very uniform, ripening towards the close of the Wilson crop; and though not of the highest flavor, sells well in a near market, where it can be offered fresh. But it also is too soft to bear long journeys by rail, and is in danger in such cases of arriving in a damaged condition.

## MINER'S PROLIFIC,

(sometimes called Miner's Great Prolific,) originated with T. B. Miner, of Linden, New Jersey, in 1877. This variety proves to be much like the Wilson in color and size of fruit, and also in quality. It is scarcely so firm in flesh, and so far as present experience enables us to speak of it, we do not find in it any desirable quality that we have not already in the Wilson.

## GLENDALE.

This variety was brought to notice by W. B. Stover, of Akron, Ohio, who found it growing in the Glendale cemetry in 1871. It has some good points for a market berry, and is deserving of careful trial. The plant is healthy and vigorous, and yields good crops, though not equal in productiveness to the Wilson or Crescent Seedling. The berries are not very large, but more uniform in size than those of the Wilson. The color is a light scarlet; the flavor good, but not best; the flesh is firm, and the calyx large, so that it bears carriage well, and the time of ripening is later than that of the Wilson. It will thus be seen that in color of fruit, firmness of flesh, and time of ripening, it possesses three good points for a profitable market berry.
