### Products/Services

Parasitology transport systems • Culture dish media  
• Prepared stains • Coagulation reagents and controls

### Current Export Markets

Europe, Asia

### Company Summary

Established in 1983, Precision Biologicals Inc. is the only manufacturer of coagulation reagents and controls in Canada. The company researches and develops products which are then manufactured from basic raw materials. Throughout the production stages, all products undergo strict quality control. The company also offers quality assurance programs for external and internal quality control of coagulation assay systems.

President

### Products/Services

Light-activated drugs

### Current Export Markets

U.S.A., Europe, Asia

### Company Summary

Established in 1981, Quadra Logic Technologies Inc. is a biopharmaceutical company primarily engaged in the development and commercialization of drugs activated by light sources. The company is a world leader in photodynamic therapy, which uses light-activated drugs to diagnose and treat diseases like atherosclerosis, psoriasis and those which are sexually-transmitted. Quadra Logic's patented drug, Photofrin, is the first photoactive drug to be used in controlled clinical trials on a variety of cancers, especially lung and bladder cancer. Currently, the company's second generation patented compound, BPD-MA, is undergoing pre-clinical toxicology testing with phase one clinical trials to begin in early 1990.

*Quadra Logic's photosensitizer, Photofrin, is activated by low power laser light, channelled down a fiberoptic probe and focused on the tumour.*
