

MR. G. M. L. T. C. A. & D. E. S.: Or,

Manufactures consum'd here is very incredible. The Produce of all the Ships we build, Lumber, Fish, Oil,
center in England to pay for them, and the Demand
for them must increase as the Country does. For while
Land is easy to be had, as it will here for Ages to come;
unless the French take it from us, there will be no Manu-
facture of any Account; Men will apply themselves to
Husbandry as the most natural and independent Life."

F. I. N. I. S.
