

trees for \$800. This is at the rate of \$1,200 per acre.

In 1907 Mr. McLaren, of Summerland, sold his crop of strawberries at a price which ran at the rate of \$1,935 per acre.

In a booklet compiled by Central Okanagan Land and Orchard Co. the following figures obtained in the Kelowna district are vouched for:

Four and a half acres of onions produced 95 tons at \$22 per ton. 10 acres of potatoes produced 200 tons at \$14 per ton—\$2,800. 1 acre of tomatoes—5,000 plants—bore 85,000 pounds, which at 2 cents a pound brought in \$1,700. Two-thirds of an acre of strawberries produced \$900. 19 acres of an orchard produced apples, pears and plums to the value of \$10,000. 22 acres of another orchard produced fruit worth \$9,000. 10 acres of four-year-old peach trees sold on the tree at \$300 per acre for the season's crop.

Such statements as these may seem to a person unacquainted with the conditions which obtain in the Okanagan as improbable or even impos-
