ANGUS HANGED HIMSELF... A Well-to-do Bachelor Farmer at Sparrow Lake Takes His Own Life

Severn Bridge, Ont., Aug. 3.—Angus McCormack of Sparrow Lake was found hanging by the neck in his barn on Sunday afternoon. He was about 45 years old and a bachelor. He has been living with his aged mother and brother. No particulars can be learned as to the cause of the rash act. The McCormacks are in comfortable circumstances and highly respected.

WONDERFUL DOGS AND PONIES... Morris Bros. Animal Circus Draws a Big Crowd—Here All Week.

Affection for the equine and canine races seems to be deeply seated in the heart of every rational man and woman. It is this feeling that makes it a pleasure to witness the feats performed by trained dogs and ponies, and a week's engagement last night, in the arena of the Morris Brothers' show, which opened at a week's engagement last night, is one that every lover of man's friends should see. The show is located in a large tent on the corner of Carlton and Parliament-streets, and last night was witnessed by an extremely full house. There are some 30 dogs, 20 ponies or so and several monkeys. All these animals are made to go through varied performances well exhibiting the skill of their trainers, as well as their own tractability. Needless to say, a large number of children were present to see the show, and their delight was unbounded. They laughed when the dogs rushed and fell around the ring, screamed with laughter when the countryman made his marvelous show, which opened a week's engagement last night, and grew highly enthusiastic over the ponies' drill and the many tricks performed by the equine and canine marvels composing this show, which was really a revelation to those who had never before seen the like. There will be performances every evening this week, with special matinees to-day and on Thursday, when it is to be expected that the arena will flock to see the performance.

Electricity and Water-power... There is no form of energy that is so far-reaching in its benefits to the welfare and comfort of the world as electricity. There is no form of energy so plentiful in a static condition as electricity. There is no kind of power that can be so economically converted by a consumer as electrical power. There is no source of energy so easy of access or so richly provided as water-power. There is no form of energy so abundant as water-power. There is no form of energy so abundant as water-power.

Hammocks... The manifest marvel of the Arrowsmith Hammock was its size and durability. They are long and they're strong. Prices are as usual as the quality of the goods.

Summer Millinery... Quickly following stock-taking, activity in the millinery department points to the new season. Already plans are being made for a month or two ahead. In the meantime the bargains in the present millinery were never so plentiful and striking. All-trimmed millinery and hats of all descriptions are at prices that had never been seen before.

A good way to keep in touch with the store as an out-of-town resident is to watch the daily store news and as you see specials advertised drop a line for samples. We cheerfully send samples of any goods that can be cut or shown in that way. You save many a dollar by this practice.

To Astonish All Canada... THE ROBERT SIMPSON CO. LTD.

The surprise that greets our merchandise when it reaches the customers makes us wonder if they didn't expect to find the values that we pack beneath our labels. We cannot do less than deal with customers frankly, and as they read this store news from day to day they may rely on the statements made. Such values, for example, as we have been giving in our Canadian Tweeds seem incredible, and yet the transaction is of a kind that this store is repeating almost daily.

August Clearing on the Carpet Floor... For a week or two we will make the bargains in Carpets and Curtains peculiarly inviting. Many of you know how low down we get prices of carpets this summer. We are likely to do even better for you during this August clearing. It is a good opportunity to buy a carpet, though you may want to hold it for a month before making use of it.

A Fine Tapestry Carpet, regularly sold at 50c, for... A Very Handsome Tapestry, regularly sold at 75c, for... Pine Brussels, with 5-8 border, to match, a regular dollar carpet, now... An End Line of Union Carpets, usually sold at \$7-1.50, for... Japanese Rugs, new goods, for... China Matting, for... Nottingham Lace Curtains, to clear at...

Clothing Bargains for Wednesday... Men's Clothing was only added after we took possession of this great store early in the present year, and we cannot explain the success that has come to the department in any other way than that we are giving better values than have at any time before been offered. We had done this for years in boys' clothing and commanded the trade of fathers and mothers in all corners of Toronto, and by our mail order system from all parts of the Dominion. We are doing just the same thing in men's clothing.

Children's 2-Piece All-Wool Halifax Suits, in grey and fawn, regular \$2.50, for... A Very Handsome 2-Piece All-Wool Suit, in grey and fawn, regular \$3.50, for... Boys' Unlined Coats, Tweed and Black and Grey Striped and Plain Lustre, sizes 24 to 32, regular \$1.50, for... Youths' All-Wool Tweed Suits, sizes 22 to 32, well made and trimmed, regular \$6.50 and \$7.50, for...

NORTH TORONTO COUNCIL... COLORED ODDFELLOWS...

Grant to West York Agricultural Society... Deviation of Woodbine Avenue...

There was a full meeting of the North Toronto Council on Monday evening at 8 o'clock. The meeting was held in the hall of the West York Agricultural Society, Woodbine Avenue.

Business Embarrassments... A winding order has been granted to the Montreal Silk Mills Company by the Superior Court of the Province of Quebec.

A Sad Death... London, Ont., Aug. 3.—Miss Ida M. Carstairs, daughter of Mr. and Mrs. John Carstairs, Belmont, came to the city Saturday night, and died at St. Joseph's Hospital of inflammation.

What Cures Disease in This?... Susquehanna, Pa., Aug. 3.—A disease has broken out among cattle in this vicinity which has not as yet been identified.

Drowned While Swimming... Port Hope, Ont., Aug. 3.—A young lad of 9 years old, named Fred Smith, was drowned while bathing in Beamish's Pond about noon today. Mrs. George Smith, the boy's mother, is a widow, her husband having formerly been a member in the Board of the town.

INFLAMMATORY RHEUMATISM... Mr. S. Ackerman, commercial traveler, Belleville, writes to me that he used Dr. Thomas' Electric Oil for inflammatory rheumatism, and through its use secured a complete cure. I was the whole of a summer unable to move without crutches, and every movement caused excruciating pain. I am now out on the road and exposed to all the vicissitudes of weather, but have never been troubled with rheumatism since. I, however, keep a bottle of Dr. Thomas' Oil on hand, and I always recommend it to others, as it did so much for me.

Drowned While Boating... Stouffville, Aug. 3.—Merrill, the 6-year-old son of Mr. and Mrs. Fitch, of Stouffville, was drowned while boating in Rogers' Pond here this afternoon.

Prospectus... PALO ALTO GOLD MINING CO. OF VICTORIA, B.C. Limited Liability.

CAPITAL - - - \$1,000,000 Fully Paid and Non-Assessable Stock, in Shares of \$1.00 Each.

Trustees: The Hon. D. W. Higgins, B. C. Nicholes, Leonard H. Selly, W. G. Estep and P. A. O'Farrell.

ALSO NEST EGG MINING COMPANY LIMITED LIABILITY.

CAPITAL - - - \$500,000 In Shares of \$1.00 Each, Fully Paid and Non-Assessable Stock.

Head Office, Victoria, B. C. Mines, Trail Creek, W. Kootenay. Trustees: G. A. Kirk, President; A. B. Erskine and P. A. O'Farrell.

The control and management of these well-known mines in Trail Creek, British Columbia, is vested in the leading citizens of the Province of British Columbia, at a meeting held on the 10th of August, 1895. The Hon. J. H. Turner, Premier of British Columbia, R. H. Rithet, M. L. A., Hon. D. W. Higgins, Speaker of the Provincial Legislature, Capt. John Irving, A. J. McColl, Q. C., E. V. Bodwell, William Dewdney, the Hon. J. H. Turner, Premier of British Columbia, and it is the intention of the company to develop rapidly and to place the Nest Egg as soon possible in the list of shipping and producing mines. The Nest Egg Mining Company was formed to acquire and operate the famous Nest Egg mine in the Trail district of West Kootenay, within a half mile of the centre of Rossland. It is a 1500-foot ledge and covers 30 acres of land. The Nest Egg mine is one of the richest and best defined ledges of the west, and has been traced from the Sunset and Gold Hunter on the west to the Commander on the east. A shaft has been sunk for 10 feet on this main ledge, and this shaft is all in ore and ledge matter from top to bottom. On the central vein three shafts have been sunk, and the vein traced for 300 feet. The west shaft is 18 feet deep and the ore in this shaft assays from 7 to 14 1/2 in gold and four per cent copper. The clean ore taken out of this shaft averages 30 per cent copper. The east shaft on this vein is about 300 feet deep and assays from 12 to 15 in gold and four per cent copper. The cost of mining, smelting and treatment for this ore averages \$12 so that the Nest Egg is now mining ore that will net it a profit of from \$12 to \$20 a ton. The Nest Egg Company has purchased the adjoining mineral claim, the Fire Fly. The Fire Fly has a fine structure well-defined ledge running through the entire claim, and development work is now being done on this ledge. The railroad from the Trail smelter to Rossland runs through the company's possible facility for the shipment of ore from these mines. The Nest Egg mine has placed upon the market 50,000 shares of stock in the Nest Egg Mining Company which are sold at 25 cents a share, and the proceeds are to be devoted to the development of the mine and the purchase of machinery. An additional 50,000 shares will be placed subsequently on the market at an advanced price. Mr. Miller, an eminent mining engineer, in his report says: "After careful examination of the Nest Egg mine and the fine ledge that are exposed on this claim, I am satisfied that the Nest Egg mine should develop into one of the rich mines of Trail Creek, and Col. Burke, a mining man of 30 years' experience in Utah, Montana, Idaho and British Columbia, states: "The Nest Egg with its great surface showing and mineral ore, has fine development and with the rich ore in sight, has all the earmarks of a big mine." The universal impression is that the Nest Egg is the richest mine in Trail Creek, and it is the intention of the company to develop rapidly and to place the Nest Egg as soon possible in the list of shipping and producing mines. The Nest Egg Mining Company was formed to acquire and operate the famous Nest Egg mine in the Trail district of West Kootenay, within a half mile of the centre of Rossland. The Nest Egg Company has purchased the adjoining mineral claim, the Fire Fly. The Fire Fly has a fine structure well-defined ledge running through the entire claim, and development work is now being done on this ledge. The railroad from the Trail smelter to Rossland runs through the company's possible facility for the shipment of ore from these mines. The Nest Egg mine has placed upon the market 50,000 shares of stock in the Nest Egg Mining Company which are sold at 25 cents a share, and the proceeds are to be devoted to the development of the mine and the purchase of machinery. An additional 50,000 shares will be placed subsequently on the market at an advanced price. Mr. Miller, an eminent mining engineer, in his report says: "After careful examination of the Nest Egg mine and the fine ledge that are exposed on this claim, I am satisfied that the Nest Egg mine should develop into one of the rich mines of Trail Creek, and Col. Burke, a mining man of 30 years' experience in Utah, Montana, Idaho and British Columbia, states: "The Nest Egg with its great surface showing and mineral ore, has fine development and with the rich ore in sight, has all the earmarks of a big mine." The universal impression is that the Nest Egg is the richest mine in Trail Creek, and it is the intention of the company to develop rapidly and to place the Nest Egg as soon possible in the list of shipping and producing mines. The Nest Egg Mining Company was formed to acquire and operate the famous Nest Egg mine in the Trail district of West Kootenay, within a half mile of the centre of Rossland. It is a 1500-foot ledge and covers 30 acres of land. The Nest Egg mine is one of the richest and best defined ledges of the west, and has been traced from the Sunset and Gold Hunter on the west to the Commander on the east. A shaft has been sunk for 10 feet on this main ledge, and this shaft is all in ore and ledge matter from top to bottom. On the central vein three shafts have been sunk, and the vein traced for 300 feet. The west shaft is 18 feet deep and the ore in this shaft assays from 7 to 14 1/2 in gold and four per cent copper. The clean ore taken out of this shaft averages 30 per cent copper. The east shaft on this vein is about 300 feet deep and assays from 12 to 15 in gold and four per cent copper. The cost of mining, smelting and treatment for this ore averages \$12 so that the Nest Egg is now mining ore that will net it a profit of from \$12 to \$20 a ton. The Nest Egg Company has purchased the adjoining mineral claim, the Fire Fly. The Fire Fly has a fine structure well-defined ledge running through the entire claim, and development work is now being done on this ledge. The railroad from the Trail smelter to Rossland runs through the company's possible facility for the shipment of ore from these mines.
