

large as it should have been, caused chiefly we believe by the recent epidemic. We take this opportunity of acknowledging God's goodness to us in this connection. Notwithstanding the very many young people who were taken away by this scourge, none of our scholars were even afflicted by it. Our School has considerably increased within the last three months, the average attendance for that period being 174. Within a short time changes have been made in several classes, a number of new Teachers have joined us, and the School is now fully equipped and in a very satisfactory condition.

BIBLE CLASSES.

These classes for young women and young men continue under the care of Mrs. Mackay and Mr. Bain. We regret that owing to family affliction Mrs. Mackay has not been able for some time past to be with her class. We trust that she may soon resume her good work.

MISSIONS.

Notwithstanding the decrease in our average attendance we have much cause for thankfulness at the continued interest shown in Missions as manifested by the contributions for the year, which are as follows:

Sabbath and Box Collections.....	\$255 28
Missionary Society	76 57
	\$331 85

In this connection the "little ones" have again done nobly, having contributed \$94.07 of this amount. The sum now reported will be allocated as usual at this meeting.

LIBRARY.

We have recently made an addition of 50 volumes to the library, and this will be shortly supplemented by as many more. With these additions, all of which have been or will be, carefully examined by a committee of teachers, our school will possess a very complete and attractive library.
