Bucharest, Rumania, March 26.—
Five million dollars in bills found in a sack in the corridor of the Simplon Express have been seized and confiscated at the Temesyar station on the Rumanian-Hungarian frontier. The owner of the money, it is asserted, was expecting to make a trip to England and the United States shortly.

Wilson was raised by Senator Ashurst, Democrat, Arizona, who said that "if any Democrat" were seeking a third term, the people ought to know of it and oppose it. Senator Borah replied that he had evidence which convinced him the president was trying for another nomination.

Senator Borah's speech was made in support of a bill he introduced to find the pre-convention expenditures of any candidate to \$10,000 in each state, to compel any person or corstate, to compel any person or cor-poration making a contribution on DAYLIGHT SAVING IN QUEBEC. curred yesterday, when Miss Phoebe Bell, a young girl of that town, was shot and killed by Newman Clark of Four Falls, a rejected suitor for her hand in marriage, Clark almost 1m-

tall pine tree anywhere from 50 to, 100 feet distant, one's curiosity is quite in naturally siqued.

No one in the mining camp seems to know exactly who was the originator of this clever scheme, but all the house wives will tell you what a splendid thing it is; for in the winter the snow falls to a depth of 20, and in some rare years as deep as 40 feet, and the winds drift it even higher. Consequently, an ordinary outside clothesline would be buried out of sight and use beneath the heavy fall of snow; but wash day comes around just as regularly during the winter stason, and to meet the problem of drying clothes some ingenious person devised the scheme of attaching a pulley to a pine tree which thrust its crown above the highest recorded snowfall. This was easily accomplished by skilling over the forcen crust of the snow. The other end of the rope was attached to a second pulley fastened to the back porch of this scheme was obsayed, all the house and when the practical side of this scheme was obsayed, all the house followed suit, and Monday's wash quickly strung up and sent fluttering out over the high-spide snow.

HAMILTON CONVENTION NOT REPRESENTATIVE

J. C. Watters Criticizes Labor Conference, Which Turned Down Radical Proposals.

California, on Monday of a summer season, that which first attracts his attention is not the big stamp mill, nor any of the scenery of the camp, but the clotheslines. They are a unique feature of the landscape, and indicate not only the depth of the winter's snowfall, but the inventive turn of mind of the housewives in the homes perched on the side of the mountain.

City dwellers are accustomed to the network of lines stretched on the flat roofs of apartments and tenament houses, country folk never cast a second glance at a backyard wherein are ordinary clotheslines, or those affixed to revolving standards. But when one first rees the, aflutter with a week's wash, extending from a back porch of a Johnville house to the top of an extremely tall pine tree anywhere from 50 to, 100 feet distant, one's turiosity is quite naturally siqued.
