

THE EVENING TIMES-STAR, SAINT JOHN, N. B., FRIDAY, NOVEMBER 20, 1925

LOCAL ENGINEERS HEAR FINE ADDRESS

K. H. Smith, M.E.I.C., of
Halifax Gives Interesting
Sketch of European Tour

The World Power Conference at Wembley, England, in June and July, 1924, and the Scandinavian tour in this connection, were the subjects of a comprehensive and interesting address given by K. H. Smith, M.E.I.C., district engineer with the Dominion Water Power Branch, Halifax, at a meeting of the Saint John branch of the Engineering Institute of Canada in the New Brunswick Telephone Co. Ltd., building last evening.

There were representatives of 89 countries at the conference, called by the British Electrical and Allied Manufacturers' Association, and notes of electric power work and methods used were exchanged. A number of addresses by Canadians were very interesting and instructive.

On July 15 they started their tour of the Scandinavian countries, going first to Norway, then to Sweden and returning by Germany and France. They noted a great difference in power developments in the first two countries.

In Norway, because of the mountains and the utilization of hill streams, great heads of water were obtainable. In this country there were innumerable opportunities for power development but there was no call for the power. Sweden was not so mountainous, the speaker went on, and far greater volumes of water were needed for power purposes. Because of the fact that the canal systems and the power systems were under the one control, the canals could be utilized.

VOTE OF THANKS MOVED.
W. R. Pearce, M.E.I.C., presided at the meeting. A vote of thanks to the speaker was moved by Geoffrey Stead, M.E.I.C., and G. G. Murdoch, M.E.I.C. Among those at the meeting was Mr. Doran, of Montreal, a member of the Montreal branch of the Institute.

Muffin Girls Now Appear in London

LONDON, Nov. 20 — Muffin-selling in London streets is the latest "profession" to be invaded by women. The muffin bell, as sure a sign of autumn as the falling leaf, is now rung by girls, who in many parts of London have replaced the men.
The girls carry baskets on their arms, instead of the familiar tray covered with green balsa, which the men balanced adroitly on their heads. Trim figures parade the quiet by-ways of London, adding one more picturesque touch to the changing modern world.

The Wrong Tonic

Millions take the wrong tonic to build up spent energies. The way to get built up is to find out what drags you down and tackle the trouble there.

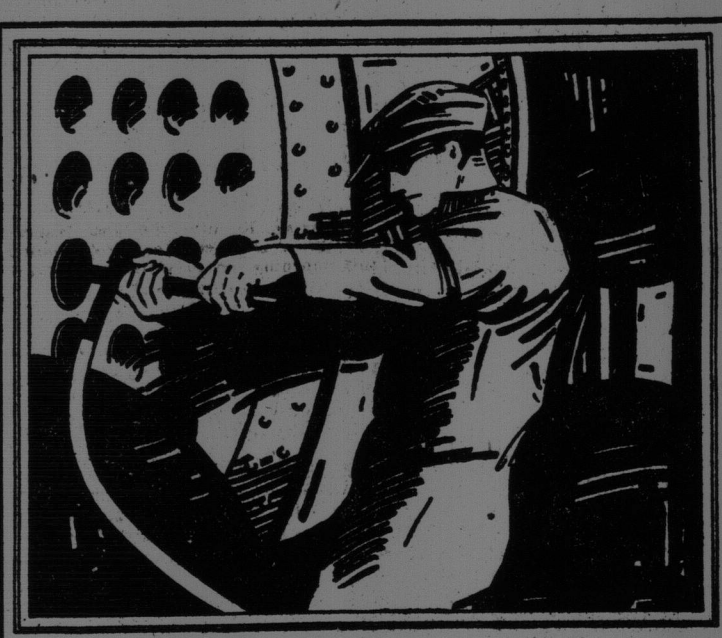

For example—four in five spend their strength unnaturally in forcing faulty eyes to do the work of normal eyes. One pair of eyes in five is normal, the others need Glasses to take the extra strain and correct the cause.

One dollar is enough to obtain delivery of the most costly style at

Sharpes

Opp Oak Hall WEEKLY

Use the Want Ad. Way

Balanced for Service

FIVE factors decide how much service you will get from Steam Hose:—
(1) The quality of cover—its ability to withstand wear and heat.
(2) The strength of fabric—its ability to withstand bursting pressures.
(3) The quality of friction—its ability to hold the fabric together under great heat.
(4) The quality of inner rubber lining—its ability to protect the fabric against heat.
(5) The skill and experience with which these first four are BALANCED.

The first four are relatively easy of attainment in hose manufacture.

But the fifth virtue, as exemplified in Goodyear Steam Hose, is secured only by long, careful study of the needs of Steam Hose users.

In Goodyear Steam Hose every part lasts just as long as every other part—the hose grows old only after giving you much longer service than you expected.

If you are interested in this kind of Steam Hose, talk to the Goodyear Dealer or ask the nearest Goodyear Branch to send a man to see you.
