ANNUAL ANNOUNCEMENT, 1877-78.

In publishing the Announcement of another Session of the Halifax Medical College the Faculty is pleased to be able to report a continuation of the success hitherto met with, the past session having been in many respects still more satisfactory than preceding ones.

As the result of the expense incurred during the past year in fitting up a Chemical Laboratory, students have been provided with efficient facilities for the prosecution of their studies in this important branch.

The supply of Material for Dissection during the past Session was more than equal to the demand; whereas in many Institutions elsewhere great scarcity has prevailed.

The Clinical Material, both at the Hospital and Dispensary, has also been abundant, enabling students to study cases of almost all classes of disease.

As proof of the thorough character of the training at this College the success of one of its Graduates at Edinburgh during the present year is very gratifying; he having passed at the head of the Graduating Class at the Royal College of Physicians and Surgeons; and in no instance, as far as known, have Students from this Institution failed to pass the examinations required by the Old Country Colleges.

Evidence of the improved condition of Colonial Colleges in the Mother Country is given by the late action of the General Medical Council regarding the standing of their Graduates, as shown by the following resolution passed at a meeting of that body held May 17th, 1877:

“That the medical qualifications granted under legal authority in any part of Her Majesty's Dominions outside the United Kingdom, and entitling to practice in such parts, should be registrable within the United Kingdom on the same terms as qualifications which are granted in the United Kingdom, but in a separate and alphabetically arranged section of the Register.”

The attention of students is called to the fact that the exception made in the Provincial Medical Act regarding students who com-
