

THREE BATTLESHIPS LOST

Every One of Ten Ships Hit In Sharp Fight With Dardanelles Forts

A despatch from London says: The Admiralty announced Friday night that the British battleships Ocean and Irresistible and the French battleship Bouvet struck drifting mines in the Dardanelles and were sunk. Most of the men on the Bouvet were lost, but nearly all the crews of the British warships were saved.

This is the most serious loss sustained by the Anglo-French fleet under Vice-Admiral Carden, which has been bombarding the straits intermittently for more than two months and has been increasing until it is now the most powerful aggregation of fighting ships ever assembled for war purposes. The three ships went down during a furious cannonading inside the straits, just outside the Narrows, in which 16 battleships participated in relays. The big British battle cruiser Inflexible and the French battleship Gaulois were put out of commission temporarily by lucky shots from the Turkish forts.

The vessels destroyed will not, it is stated by the Admiralty officials, interfere with the Dardanelles operations in the slightest. The lost ships will be replaced and the attack on the forts will be carried on until the strait is passed. Naval experts say that both France and Great Britain expected to pay a big price for the possession of Constantinople and that the general scheme discounts even greater losses.

Menace of Floating Mines.

The mines in the Dardanelles have proved a much greater menace to the allied fleet than the numerous naval forts, and naval authorities have predicted that as soon as the strait was cleared of that danger, the passage would soon be forced. Grimsby trawlers and French fishing boats have been sent to the scene in large numbers, and have been engaged night and day in sweeping the channels clear. At one time the task was almost completed, but recently the Germans and Turks have adopted the plan of launching floating mines, which come down against the ships with tremendous force, swept at the rate of nearly ten miles an hour by the strong current from the Sea of Marmora.

Kephez Forts Silenced.

The Kephez forts replied strongly when the battleships advanced firing up the Dardanelles and all the ships were hit. It is asserted that these forts finally were silenced and a bombardment of those in the Narrows was under way when the three battleships struck the mines. The blowing up of the ships did not cause a cessation of the fighting, which continued until darkness intervened.

"It is officially confirmed that a Russian squadron has approached the northern part of the Bosphorus," says Reuter's Petrograd correspondent. "The appearance of the squadron caused a great panic in Constantinople."

Socks Still Required. Also Handkerchiefs

A despatch from London says: We are asked to notify the societies working for the Canadian contingent that most kinds of extra woolen comforts will not be required much longer, as supplies in hand are likely to meet the demand. Socks, however, are always required, also colored handkerchiefs, tobacco, pies, games, newspapers. The War Contingent Association here is sending over frequent consignments to all sections of the Canadian forces in the field, also to those sections still in England. The comforts which have been so popular at Salisbury are to be continued at Shorncliffe. A Canadian officer writing from the front proposes to the last batch of magazines sent out says they are almost worth their weight in gold. Twenty-five sacks of Canadian newspapers sent last week have arrived.

ENLISTING NOW TO FILL GAPS

Will Be No Call for Volunteers for Fourth Contingent.

A despatch from Ottawa says: Statements that the Militia Department would shortly call for volunteers for a fourth Canadian contingent designed eventually for the front are not quite in accord with the facts. There will be no fourth contingent, so-called, and no third contingent. But drafts of reinforcements will be sent forward steadily to fill the gaps in the Canadian lines. While these will be sent as they are needed a strong force will be maintained under arms in Canada, in accordance with the Prime Minister's statement issued some weeks ago.

Turk Horde in Persia Slew Many Civilians

A despatch from London says: The Foreign Office was advised that Turkish soldiers recently ran wild in the Urumia district of North-western Persia and killed several hundred civilians. The Turks are said to have burned several villages after looting them.

WOMEN OF GREAT BRITAIN

Government Wants Names of All Who Are Ready to Fill Positions and Release Men for War

A despatch from London says: "Any woman who by working helps to release a man or to equip a man for fighting does a national war service," says Walter Runciman, President of the Board of Trade, in an appeal to the women of the country.

"If the full fighting power of the nation is to be put forth on the field of battle," the appeal continues, "the full working power of the nation must be made available to carry on its essential trades at home. In certain important occupations there are not enough men and women to do the work. In order to meet both the present and future needs of national industry the Government wish to obtain particulars from all women available, with or without previous training, for paid employment.

"Accordingly they invite all women who are prepared, if needed, to take paid employment of any kind—industrial, agricultural, clerical, etc.—to enter themselves upon the register of women for war service. The registration is for the purpose of finding out what reserve forces in women's labor, trained and untrained, can be made available if required."

Canadian Soldiers Hurt in Collision

A despatch from London says: A collision occurred near West Malling, Kent, between two vehicles belonging to the Canadian contingent, with the result that one was overturned and the whole of the occupants were thrown out. Six of the men were found to be rather seriously injured, and were conveyed to Malling Hospital.

French Soldiers Wear Armor Nowadays.

Armor is now being freely sold by shopkeepers in Paris to the French soldiers, who say it has been the means of saving many lives on the battlefields. There are pieces covering the chest, abdomen and head. The whole outfit costs about ten dollars. This photograph shows the armor in the position in which it is to be worn.
