

This shows that a deep and general impression has been made on the people by the bad tidings from that Country - Yesterday it was decided to have a deputation of members wait on the Government to urge a substantial contribution for the Dammission - Senator Douglas will probably be asked to arrange & lead the deputation - He may kindly consult you

So I remember especially interested in China and our share from your special knowledge of the country and its people you will be advised to show a sympathetic interest in the object the deputation will urge - I trust you will be able to reach Singapore before the Douglas that will be my regret -
The Mackenzie King's Council of Advisors
