

The McGill Martlet

EDITORIAL

The Science Dinner. The second annual dinner of the Faculty of Applied Science is to be held on Feb. 21st, at the Place Viger Hotel, and it is earnestly hoped that every Science man will make a point of being present on that occasion. This is the second Faculty dinner and the success of the one held last year should serve to bring out a large number. There is absolutely no reason why the Freshman and the Soph. should not lie down together (so to speak), at this banquet, and though the old time war between these two great bodies is ended by a dinner in which all four years join, the fact that the men get together as Science men in a body, is sufficient excuse, if any were needed, for a Faculty dinner. A large turnout of Science men is wanted and the date is February the 21st.

The Science Dinner—February 21, at the Viger.
