

### You insure against fire— Why not against decay?

There is a small chance that your buildings will be burned, but there is an absolute certainty that they will decay if you neglect to keep them well protected by good paint.

Protection depends upon the character of the paint you use. Some paints permit moisture to go through to the wood, which starts decay and soon ruins the building. The paint that gives complete protection is

### Low Brothers High Standard LIQUID PAINT

It adheres tightly and sets in a tough, durable coat that resists moisture and wear for years. It is the one paint that years of outdoor tests have proved will insure greatest protection of your buildings.

Ask your local "High Standard" dealer to give you Paint Information and other recommendations for exterior, interior walls, doors, woodwork, etc.

Through trains Toronto to Winnipeg and vice versa, COLONIAL GARS ON ALL TRAINS.  
Particulars from Canadian Pacific Agents or write M. G. Murphy, D.P.A., Toronto.

### Bulls Running at Large

A deputation representing several of the live stock associations, more particularly the dairy cattle breeders' associations, waited upon Hon. Mr. Duff, Minister of Agriculture for Ontario, on Thursday of last week and asked for legislation imposing a minimum penalty of \$50 on farmers who allow their bulls to run at large, and also that minimum damages of \$50 be allowed wherever a cow is got in calf through bulls being at large. Hon. Mr. Duff gave the deputation a sympathetic hearing, and later the members of the deputation had a long interview with Deputy Minister C. J. Bailey, who promised to frame a bill covering the desires of the deputation for submission to the Legislature.

It was decided to reduce the proposed minimum fine of \$50 where bulls are found at large to a minimum fine of \$25. Among those on the deputation were Alex. Hume and Wm. Stewart, of Menie, representing the Ayrshire Breeders' Association; the Mosses Bull, of Brampton, representing the Jersey Breeders' Association; and Messrs. R. F. Hicks, Newtonbrook; W. A. Clements, St. George; J. W. Richardson, Caledonia; D. D. C. Platt, of Millgrove, representing the Holstein breeders.

### Free Drainage Surveys

Farmers! Have you a field on your place that is too "wet, cold and sour?" Drainage will reclaim it and make it one of the best fields on the farm.

Drainage does four things. First, it removes the surplus water and makes it possible to cultivate and

### Results for Advertiser

I think I never had so many enquiries, and especially for seed oats. At first the 25c cent of sales was small, but they have increased, and the oats are nearly all gone, with hardly going nicely. One thing is very plain—the advertisements are well read, and reach the right parties—Alfred Hutchinson, Mount Forest, Ont.

seed about three weeks earlier in the spring than on the same land when undrained. Secondly, it makes the land from 10 to 15 degrees warmer than if not drained, and this warmth germinates the seed properly and gives a good stand of grain. Thirdly, it lets plenty of air down to the roots of the plants, which is necessary for satisfactory growth. Fourthly, it makes the soil more porous, and this in turn causes the soil to store up more water for the use of the crops in time of drought.

Frequently the increase of crop in one year pays for the drainage, and seldom or never does it take longer than three years, so that drainage pays from 53 per cent to 100 per cent per annum on the money invested.

Have you difficulties in drainage? The Department of Physics of the Ontario Agricultural College will assist Ontario farmers on a complete survey of the area to be drained, or run a single line of drain, and when showing location of drains, grades, sizes of tile, etc., a detailed guide for the thorough drainage of the land in question. No charge is made for the services of these drainage advisers, nor for the maps, only the applicant pays the travelling expenses in connection with his case, amounting usually to not more than a couple of dollars.

Drop a card to the Department of Physics, O.A.C., Guelph, for the regular application form.

### THE BEST FARM LUBRICANTS

Proved best by years of use.

### PRAIRIE Harvester Oil

The most durable oil for farm machinery. Unaffected by changes in temperature. Will not gum or corrode. Reduces friction to a minimum. A splendid lubricant.

### STANDARD Gas Engine Oil

Meets all requirements for a cylinder oil for gasoline and kerosene engines. Lubricates properly under all conditions; practically free from carbon. Equally good on external bearings.

Recommended by the leading engineers and engine builders.
