

**FOUNDATION OF ROADS** is the subject now under most earnest investigation by Engineers throughout the World. Poor foundations and road surfaces are found everywhere—costly, short lived roads. THERE IS NOT ONE FOUNDATION ON THE MARKET TO-DAY THAT PROPERLY SUPPORTS THE SURFACE. The steel rail and the wooden cross tie always the same, but the highway is a different thing; different surface and different foundations are required for different services. We have three different foundations; they DO properly support the surface, and, IN OTHER WORDS, they give a life to the surface that was never before even contemplated. The Nash Road, Borough of Brooklyn, N. Y. City, U.S.A.
