

Fuel and Repairs

You can lower these expenses

Careless lubrication is responsible for most of your fuel and repair expense.

About one-half of the automobile engine troubles are caused by incorrect lubrication.

Two things must always be considered in an oil—one is its quality; the other is its fitness for your engine.

Oil of low quality or of a body incorrect for your engine may bring practically every trouble an engine can face.

Aside from repair troubles, you must face a plain fact:

The more power you waste the more fuel you must consume.

You cannot get perfect lubrication unless the quality

is right, and the body of your oil suits—

1. Your type of lubricating system.
2. Your piston clearance.
3. Your bearing design and adjustments.
4. Your bore and stroke.
5. Your engine speed.
6. The size and location of valves.
7. Your cooling system.

Gargoyle Mobiloils are sold by a Chart, which specifies the correct grade for each car. If you do not at present use the grade of Gargoyle Mobiloils specified for your car on the Chart at the right, you may feel almost certain that your bills for fuel and repairs are higher than they should be.

If your car is not listed in the Chart shown here, send for copy of booklet, "Correct Lubrication," which lists every common make of automobile, truck and tractor and motorcycle.

Gargoyle Mobiloils are sold in 1 and 4-gallon cans and in wood half-barrels and barrels.

It is safest to purchase Gargoyle Mobiloils in original packages.

IMPERIAL OIL LIMITED

Manufacturers and Marketers of Polarine Motor Oils and Greases.
Marketers of Gargoyle Mobiloils in Canada.

BRANCHES IN ALL CITIES

Correct Automobile Lubrication

In the chart below, the letter opposite the car indicates the grade of Gargoyle Mobiloils that should be used: For example, A means Gargoyle Mobiloil "A," Arc means Gargoyle Mobiloil Arctic, etc. The recommendations cover all models of both pleasure and commercial vehicles, unless otherwise noted.
