

DEERING TO THE RESCUE!

WHEN SOMETHING GOES SNAP

on that binder for which so much was promised, and there is an enforced halt in the midst of the busy harvest, the farmer instinctively turns to the Deering for succor.

No crop is beyond harvesting when there is a DEERING IDEAL BINDER on the ground. It will cut, elevate and bind any condition of grain. It is built to meet every requirement, and meet it satisfactorily. It is the all-round, ever-dependable machine.

Get a Deering Binder and you will be always ready for harvest.

The Deering Harvester Company controls the entire output of the Mann Manufacturing Co., Limited, of Brockville, Ont., and are prepared to supply the trade with the famous Mann line of Seeding and Tillage machines.

The Good Points

IN A

**CEMENT
SILO**

MR. GEO. LEITHWAIT, of Goderich, explains their superiority over wood, and the cost of one he built.

GODERICH, HURON COUNTY, ONT., DEC. 1, 1901.

THE RATHBUN COMPANY,
310-312 FRONT ST. W., TORONTO, ONT.,
Sales Agents for THE CANADIAN PORTLAND CEMENT COMPANY, Limited.

Dear Sirs,—I take pleasure in writing you a few lines telling you how pleased I am with the round concrete cement silo built for me by G. O. Echlin. It has not a crack nor fault, and is as hard as stone. I hope that my experience will be of benefit to others who propose erecting silos, as I have spent much time and trouble looking into this question.

A short time ago I built a small wooden stave silo, but found that the ensilage around the outside, or about ten per cent., was spoiled. Now, when I opened the cement silo, on November 1st, and took three or four inches off the top, I could not see any difference between what was in the center and that against the walls.

This silo has a capacity of one hundred and fifteen tons, and cost me one hundred and sixty-four dollars, as follows:

Thirty barrels of BEAVER PORTLAND CEMENT, \$90.00; forty-six yards of gravel, \$4.00; quarter-inch iron to build in walls, \$4.00; labor, four men eight and one-half days with mixing machine, \$36.00.

It is thirty feet high, fourteen feet in diameter, twelve inches thick at bottom and batter on outside reducing to 6 inches at top. The proportions of concrete were one of BEAVER PORTLAND CEMENT to twelve of good gravel.

I would recommend the use of your cement where good solid, satisfactory work is required.

Yours truly,
GEO. LEITHWAIT.
