IDEAL WOVEN WIRE FENCE

When you build fence, you ought to be thinking of permanent improve-
ments. Tinkering does not pay. Fences made of light wire, and wires that
break rather than give when it gets cold; fences that an unruly animal
could break through; fences not properly stayed—these are not paying
fences. It takes only a glance at the Ideal fence to see that it is the right
kind. It is made of No. 9 hard steel wire from top to bottom, and is heav-
ier and stronger than any fence on the market. Remember, it costs no more
to dig your post holes, set your posts, stretch your fence and staple it when
the heavy Ideal fence is used than for a light, flimsy article. And notice
how the Ideal fence is locked at every crossing. It is heavily galvanized
cold, and always presents a handsome, well stretched appearance. You do not buy
fence for exactly the same reasons. It pays to study the matter over thoroughly be-
fore you buy any kind of a fence. We have prepared a little book that will tell you
all about Ideal fence. It gives fence pointers and details that we cannot give here.
Write and let us send it to you. A postal will do; write to-day.

McGregor-Danwell Fence Co., Dept. B, Walkerville, Ontario.

A. EDWARD MEYER GREENGILL HERD

Box 378. Guelph, Ont.

Weston, G. T. R. and C. P. R., and electric cars
from Toronto.

QUESTIONS AND ANSWERS.

Miscellaneous.

PERCENTAGE OF DRESSED TO LIVE WEIGHT.

1. Heifer, one year old, live weight
800 lbs., what per cent. of live weight
should she dress?
2. Is there any standard to determine
weight of live cattle by measurement?

W. A. B.

Ans.—1. We cannot estimate this
heifer's probable carcass weight without
seeing it any more than we could tell
you how fast an 800-lb. colt could trot.
A reasonable conjecture, according to the
subjoined table would be 45 to 55 per
cent.

2. Below is a table given by Primrose
McConnell, a British authority, which
covers the ground about as well as any
data we have at hand. There must
necessarily, however, be wide variations
from this standard, particularly now-
days when the early-maturing type of beef
animal is more in evidence than it used
to be.

Live weight, Pounds, Avoidupois.	Per Cent. of Beef.	
	Class 1.	Class 2.
Under 2520	70.72	66.69
2520	69.71	66.69
1660-2100	66.68	63.66
1400-1680	66.68	63.66
1400-1680	62.65	60.62
1260-1400	62.65	57.62
1200-1260	57.61	54.59
1120-1260	57.61	51.56
980-1120	53.56	50.53
Under 980	53.56	45.47

WHICH END OF A POST TO PUT DOWN.

In putting up a fence, is there any dif-
ference which end of cedar post is put in
the ground for to last longest? We al-
ways put the large end down, but I have
been told the top end will last longest,
if put down that way.

J. H.

Ans.—We have heard the same claim
made as our correspondent—that a post
should always be planted the reverse of
the direction in which it grew—but we
are unable to speak positively. There
is room here for some reliable experi-
mental work, or perhaps some reader
may be able to give us something au-
thentic; but we do not want any experi-
ence of the kind illustrated in the follow-
ing anecdote, heard by the writer some
years ago. A discussion was on as to
the durability of cedar posts, and one of
the participants, a man about forty
years of age, capped the climax by as-
serting that cedar posts, properly set,
would last a hundred years; he and his
father had tried it twice!

BREED OF SHEEP.

For a person going into pure-bred
sheep, which breed would be most profit-
able, Shropshires or Cotswolds?

SUBSCRIBER.

Ans.—It must depend on the man's
preference. Both breeds are good, the
Cotswolds being, however, better suited
to lush pastures and good feeding, than
to more frugal fare. The Shropshires
are a hardy breed, and being well
woolled on belly, legs and face, and
covered on back with a dense fleece that
does not part in the middle, they are
peculiarly well fortified against the in-
clemencies of a northern climate. There
is no better or more widely-favored breed.

WANT A MAN?—What is one of the
greatest needs of Ontario and Ontario
farming to-day? Men, good men, to oc-
cupy farm land and aid in working our
farms. To help solve this problem, the
Salvation Army will this season bring to
Canada 10,000 farm hands. From 1,600
to 2,000 will sail from Great Britain in
March, April and May. If you need one,
and likely you do, apply at once, men-
tioning "The Farmer's Advocate," to
Brigadier Howell, James and Albert Sts.,
Toronto, Ont.

Bog Spavin

Lameness resembling
bone spavin, but the bunch is in front of the
true hock joint, a little to the inner side, and
soft and yielding, hardening sometimes as
the case grows old.

Fleming's Spavin Cure (Liquid)

is a special remedy for the soft and semi-solid
bunches that make horses lame—Bog Spavin,
Thoroughpin, Splint, Orb, Capped Hock,
etc. It isn't a liniment to balk the part,
nor is it a simple blister. It is a remedy un-
like any other—doesn't irritate and can't be
imitated. Easy to use, only a little required,
cures the lameness, takes the bunch, leaves
no scar. Money back if it ever fails. Write
for Free Horse Book before ordering. It
tells all about this remedy, and tells what to
do for blemishes of the hard and bony kind.

FLEMING BROS., Chemists.

45 Front Street, West, Toronto, Can.
