Comfortable-Cosy-Cheerful

A Perfect Warm Air Heating System for "Guide" House Plan No. 1

Saves one ton of coal out of seven. Guar- anteed to heat your house thoroughly.

Using the Celebrated HECLA Furnace and the latest system of instal- lation. There is no huddling about the register to keep warm. The rooms all over the house are comfortably heated-every corner is warm.

Special Hecla Features

The Steel Ribbed Fire-Pot is indestructible and adds 200% to the Radiating Surface of the same. This feature alone saves One Ton of Coal out of seven.

The HECLA has a Cast Iron Combustion Chamber, combined with a Steel Radiator. These parts are made in one piece by means of our Patent Fused Joint, thus there is no smell of gas through the house; no dust or smoke coming up the registers.

The Individual Shaking Grate Bars give a most perfect method for attention. The sides where the greatest burning takes place, can re- ceive special care and be shaken separately.

The Circular Water Pan of the HECLA, running all around the furnace, sends moisture to every warm air pipe. Every room gets its proper share. Let us send our Booklet which fully describes and illustrates these and other Special Features not to be had on any other furnace. We will furnish No. 16 HECLA Furnace, with the proper size Warm and Cold Air Registers, and all pipes and Fittings, for the sum of \$93.50. This plant installed, according to our Plans and Specifications, we will guarantee to heat your house thoroughly in the coldest weather.

We manufacture the ADANAC and IMPERIAL BOILERS for Steam and Hot Water Heating. Our HYDRO-THERMIC RADIATION, is the latest and best type of Radiation, in efficiency, economy and appear- ance. INVESTIGATE IT. We will be pleased to furnish Plans and Estimates free of charge.
