IN MEMORY OF THE TEMPERANCE ORDERS OF U. S. AND CANADA

On Thursday, Sept. 29th, 1921, there assembled at Westminster Abbey, Bro. E. L. G. Hohenthal, M. W. P. of North America, and his son: Bro. W. J. Wightman, M. W. Trustee, G. S.; Bro. H. Kennard, G. W. P.; Bro. A. W. Thomson, G. T.; and Bro. W. C. M. Wightman, M. W. A.

By kind permission of the Abbey authorities Bro. Hohenthal was allowed to place upon the grave of The Unknown Warrior, a silk flag made up of the flags of the six chief allies in the War: France, Italy, Belgium, Japan, United States and Great Britain.

Britain. The ceremony was simple; under the direction of a gentleman representing the Dean, the Brethren gathered at the barrier surrounding the grave. Part of the barrier was drawn aside and Bro. Hohenthal quietly placed the combined flag upon the grave. The flag bore the following inscription:—

"This flag is placed here as a tribute for the service, devotion, valor and sacrifice rendered by him who is buried here and of all his associates of this and the Allied Nations in the name of his comrades in arms, Members of the Sons of Temperance of Canada and the United States by the Most Worthy Patriarch of, and for the National Division of North America, on this 29th day of Sept., 1921, the Seventy-ninth Anniversary of the birth of the Order.

Emil L. G. Hohenthal, So. Manchester, Conn, U. S. A. The very great kindness and courtesy extended to our Brethren by the Abbey authorities was very warmly appreciated and will be gratefully remembered.—Forward

SAY LIQUOR IS OF NO VALUE AS MEDICINE.

A majority of physicians in 19 States, representing all sections of the United States, replying to a questionnaire sent out by the Journal of the American Medical Association, assert that they did not regard beer and wine as necessary therapeutic agents in the practice of medicine.

About two thirds of these physicians declared there were no instances in their practices where suffering or death had resulted from enforcement of the prohibition law, and about three fifths favored restriction in prescribing whiskey, beer and wine.

In the 19 States 6797 physicians replied they did not consider whiskey a necessary therapeutic in the practice of medicine, and 6519 asserted they had found it of value. Beer as a therapeutic agent was supported by 2668 physicians and opposed by 9982.

CANADA'S NATURAL RESOURCES

Attention is now being directed towards the country's natural resources, as never before, since it is generally recognized that only by a more widespread utilization of Canada's undeveloped lands, mines, forests, water-powers and fisheries can present day economic problems be solved.

The Natural Resources Intelligence Branch of the Department of the Interior has published a map showing the leading natural resources of each province. In Nova Scotia mixed farming, mining and fishing predominate; in Prince Edward Island fur-farming and agriculture. New Brunswick has large areas of timber, while mixed farming and fruit growing are outstanding interests. In Quebec may be found a wealth of timber for pulp-wood, also minerals such as asbestos, graphite and molybdenite, while in Ontario somewhat similar opportunities exist.

In the Prairie Provinces the prospective settler or investor may obtain adequate returns on capital and labour in either grain growing, mixed farming or ranching while in British Columbia timbering, fishing, fruit-growing and mining are among leading industries.

In addition to information on natural resources, the map shows all railways and trade routes. An interesting and valuable feature is a series of comparative diagrams illustrating the production and exports of the various provinces. A copy of the map may be obtained free of charge upon application to the Natural Resources Intelligence Branch, Department of the Interior, Ottawa.

POT AND KETTLE

"You have such strange names for your towns," an Englishman remarked to one of his new American friends. "Weehawken, Hoboken, Poughkeepsie, and ever so many others."

"I suppose they do sound queer to English ears," said the American, thoughtfully. "Do you live in London all the time?"

"Oh no," said the unsuspecting Briton, "I spend a part of my time at Chipping Norton, and then I've a place at Stoke Newington."

READING IN BED

In a lecture on the eye, at the Institute of Hygiene, Dr. R. H. Elliott has just been discussing reading in bed. The best advice he can give is not to read in bed at all; but if anyone must do so, then he can prevent its being harmful by having a good light and by holding his book in such a way that he is always looking down on it. Our eyes have grown accustomed to locking down mostly. If we look at the level of the eye of higher the muscles from their unaccustomed work and a headache comes on when we look up in a picture gallery. So if you must read in bed, sit up and look down at the print, or anyway, keep the eyes above the level of the book, and never look up at the book.

Is Now a Healthy Boy

"From a puny, delicate child, my little Johnny has become a strong sturdy boy."

One mother writes: "If you had seen my little Johnny four months ago and you were to see him to-day, you would never believe that he is the same boy. Then he weighed only 49 pounds. To-day he weighs 90 pounds, almost double what he weighed four months ago. His trouble first started with a cold, which we never noticed because he was strong and like all boys of his age occasionally caught cold. After a while we began to notice that his cough, instead of getting better, was getting worse, that he was looking pale and losing weight. He seemed to be tired all the time, had no energy to do anything. Before he caught this cold he had no trouble with his lessons and remained at the head of his class without much study. But we began to notice a change. He didn't seem to care whether he knew his lessons or not and nothing seemed to interest him. He coughed so much and so hard at times that his face would become purple and we thought he would surely burst a blood vessel. Medicines and cough mixtures didn't do him any good. Finally, in desperation and as a last resort, we tried Carnol. In a short time his cough had almost disappeared. His appetite was returning and he was beginning to take an interest in his studies. And, thanks to Carnol, he has become as strong and healthy as he has ever been."

Carnol is sold by your druggist and if you can conscientiously say, after you have tried it, that it has not done you any good, return the empty bottle and he will refund your money. 1-122
