

Aided by the Enemy.

The *St. John Sun* says:—"We do not know," says the *Toronto Globe*, "a party who has profited more by the publicity of the present tariff controversy than the Premier of the Dominion," and we hasten to endorse the statement. He has profited by its personal abuse, its misstatements, its insinuations, its attacks on the wolf, when there is no wolf, which have made him friends, disgusted his enemies, and have, in the end, created a profound distrust of its statements. Sir Leonard Tilley has been a greater cause for gratitude to the British Empire than the tariff. His unrelenting, cohesive effort among his friends, and stirs up enthusiasm for him in election campaigns, has done more to the nation has been impending, committees of his friends have met and counted, among the things which would aid them in their efforts to bring down the *Globe* and Freeman. And since the *Telegraph* jumped the political fence, at the heels of the *Globe*, and joined the *Globe* and *Freeman* in abusing everything and everybody it had formerly praised, its opposition has been counted upon as a sure vote for the *Globe* and Sir Leonard Tilley's favor. We hope their organs will keep it up. Nothing could do more to strengthen the Conservative party than that they should change their tune. The *Toronto Globe*, content with what it has done for Sir Leonard Tilley, has been lately more energetically trying to strengthen Sir Charles Tupper in the confidence of his friends, than to try to bring down the *Globe* and it is succeeding very well. Every one of its frantic outbursts against him adds something to the respect with which he is regarded by the public, and as a statesman and administrator of an important department. The *Globe* is perpetrating a great mistake, in its effort of great service to its opponents.

Canada for the Canadians.

"We have had experience in this land of how the National Policy is benefitting Canadian manufacturers. A few years ago, when the great Prairies of Minnesota, Wisconsin and Illinois supplied us with carriages, cutters, and farming implements, and the provinces of the West supplied us with lumber, and in these lines from the eastern provinces to-day Ontario manufacturers are so crowded with work of this description that they are unable to supply the demand; that in some cases, it is said, it will take a good part of the summer to fill the orders of the great Prairies. And yet, very large supplies already coming to hand under the tariff. The Canadian manufacturers have secured a splendid opportunity to show that they have been slow to avail themselves.—*Winnipeg Times*."

A SURPRISED PHYSICIAN.
A DYING PATIENT RECOVERS THROUGH THE INTERPOSITION OF A HUMBLED GERMAN.—Some weeks ago a certain well-known physician, living on C—street, was called to attend a very complicated case of rheumatism. Upon u-

living at the house he found a man about forty years of age, lying in a prostrated and serious condition with his whole frame dangerously affected with the painful disease. He prescribed for the patient, but the man continued to grow worse, and on Sunday evening he was found to be in a very alarming condition. The knees and elbows and larger joints were greatly inflamed and could not be moved. It was only with extreme difficulty that the patient could be turned in bed, with the aid of three or four persons. The weight of the clothing was so oppressive that means had to be adopted to keep it from the patient's body.

The doctor saw that his assistance would be of no avail, and left the house, the mem-

bers of the family following him to the door, and the poor and humble German shoemaker, appeared to the grief-stricken ones as a saving angel. He had heard of the despair of the family, and now asked them to try the medicine of St. Jacobs Oil. As a drowning man will catch at straws, so the poor wife applied this remedy; she had no hope, but she had a desperate remedy, and she tried it. The first application eased the patient very much; after a few hours they used it again, and, wonder of wonders, the pain vanished entirely. Every subsequent application brought the same relief, and the patient was well and out. When the doctor called a few days after, he was indeed surprised; for, instead of a corpse, he found a new-made man.—*Exchange.*
