If MEDICATED SYRUP—Truth loves an incredulous audience, for if they listen, they are sure to become converts. If there is any man or woman who challenges the statement that Barry's Tricopherous is a specific for cutaneous diseases and injuries, and the best preparation for the hair extant, all that is asked is that he or she will try one twenty-five cent bottle of the fluid, and read the pamphlet in which it is enclosed. Read and make the trial. Truth will then force conviction upon the mind, that all, and more than all, that has been claimed for the preparation by the inventor, in as palpable a fact as the existence of the sus, or changes of day and night. Referring the reader to the thing itself, and the accompanying treations for a solution of all his doubts, if he entertains any, we will here briefly state what the Tricopherons will do. It will remove sourf and dandruff; it will restore, preserve and benutify the hair; it will prevent it from becoming harsh or gray; it will dispose the hair to curl and render it glossy: it will relieve inflammation, taching and all irritation of the skin; it will care bites and stings of insects; it will take away the pain of cuts, burns, bruises and agrains; it will ally the pain of rheumatism and cure headache. For these reasons, it ought never to be sheen from the dwelling of any family, and no one chould travel without it. terminate my existence; and, in addition to the Fits, I was reduced

to a mere skeleton, and was extremely weak and nervous. I heard a

Agent. I was advised to try it. And strange and wonderful to re

Indeed, so rapid and effectual was the cure, that it appeared to me to

OR, ARTIFICIAL SLATE.

Tills admirable article has been tested for some years and provate and very valuable, becoming a perfect slate, as hard as marble in a few months, completely, protecting whatever is costed with it from the action of the weather and fire—a better fire-proof than tin or zine. Several Insurance Companies certify they will insure buildings covered with it at a cheaper rate, than if covered with hose metals. It is of two colors, the black is best for roofing—the chocolate the best thing ever discovered for sides of either brick or wood, forming a perfect stone coating of a handsome stone or checonic color, can be easily changed by a little white lead or other coloring matter to suit the taste. There is nothing equal to it for teambout and car decks, and all kinds of iron as it forms a coating early as hard as the iron itself, and never cleaves of.

At the popularity of my paint has induced scores of unprincipled individuals to grind up, and offer as fire-proof paint, all kinds of worthless stuff, much of it nothing but rotten stone that has no cohesive attraction, is held or only by the oil with which it is applied; consequently as soon as the action of the atmosphere destroys the oil, it will wash or rub off like Chalk or Whiting, nothing can yet be known of its lasting qualities, as it is but little over a year since they got them up, whereas mine has been tested about seven, and where first applied is now like a stone.
