

Making Better Cakes

There is nothing better for making cakes than Freeman's Egg Powder, which is not merely a substitute for eggs but actually an improvement upon them—being lighter and more digestible. It is also much more economical in use than are eggs.

Diana Encounters Berg.

FISHERY CONDITIONS IN THE STRAITS.

(Western Star.)

With her nose somewhat disfigured from contact with an iceberg, the S.S. Diana, Capt. Norman, reached port at 5.30 p.m. on Monday. The ship was on her way coming up the Straits last Thursday during a thick fog when she ran into a huge iceberg between Henley Harbor and St. Peter's Island. The ship was going at less than three-quarter speed at the time. So dense was the fog that the berg could not be seen until the ship was within a few feet of it. The engines were reversed and the helm swung around in an effort to clear the great floating mountain, but there wasn't room and an impact occurred as the ship was swinging off. Her bowsprit, figure head and other head gear were carried away, but the hull of the ship suffered little or no damage, due to the bowsprit taking the force of the impact. Ice bergs are numerous in the Straits, and no sooner had she cleared from her first when another loomed through the fog close by and the ship had to pass between the two. They were monster bergs, reaching higher than the ship's spars, in fact the tops of the peak's could not be seen, they being capped with fog. The ship reports little or no cod between Battle Harbor and Red Bay, but at Bonne Esperance, Whitley, Buckle, and others are getting all the fish they can handle, and there is also good fishing westward from there. Cod is very scarce on Newfoundland side of Straits, thought to be due to prevailing southwest winds. At a few places along the coast, however, fishermen get a little when bait can be procured and weather is suitable for getting on the grounds, but bait is very scarce and there are gales of wind almost continually. It was not known when the Diana arrived here whether she would make another trip north before the service is taken up by one of the steamers recently purchased in Canada.

McMurdo's Store News.

FRIDAY, July 23. Myol is a refined liquid petroleum of the utmost purity and careful preparation, tasteless, colorless, and odorless, with sufficient "body" and viscosity to be most effective for the purpose, and is recommended in cases of constipation and sluggish bowels as a lubricant and in effect laxative. Its action is purely mechanical, it is not absorbed into the system, and the objections made (often with some reason) to ordinary laxative remedies, do not here apply. The manufacturers of this product claim that they have evolved the perfect thing of the kind, and that Myol stands in all that goes to make perfection in such a product, head and shoulders over anything else in the market. The outlook for the trap fishery is reported to be very poor but hook and liners may secure a saving voyage. Strong weather with S.W. winds has hampered operations. Caplin is being obtained from New Melbourne for bait. Local trap fishermen did well again yesterday, and in the present spurt continues for another week or so good voyages are assured.

MINARD'S LINIMENT CURES DANDBUFF.

Never a corn on millions of feet nowadays

Do you know that millions of people who use Blue-jay keep entirely free from corns?

If a corn appears it is ended by a touch. A Blue-jay plaster or a drop of liquid Blue-jay is applied.

The corn pain stops. Soon the whole corn loosens and comes out.

The method is scientific. It is gentle, easy, sure. Old-time harsh treatments are supplanted by it with everyone who knows it.

It is made by a world-famed laboratory, which every physician respects.

It is now applied to some 20 million corns a year. You can see that corn troubles are fast disappearing.

Then why pare corns and keep them?

Why use methods which are out-of-date?

Try this new-day method. See what it does to one corn. You will never forget its quick and gentle action. Your druggist sells Blue-jay.
