

A Labor War at Toronto; Police Guarding Workmen

A Unique Situation Caused by the Molder's Strike.

The Company Houses, Feeds and Gives Protection to New Men.

Workmen Sleep in Tents, Around Which Are Arc Lights to Show Approach of Mob.

Toronto, July 16.—The most unique fight between capital and labor that has ever occurred in Toronto is being waged between the striking union molders and their employers, the Canada Foundry Company, at Toronto Junction, England, Scotland and the United States have been scoured for molders, and today, under police protection, sometimes armed, 40 molders claiming among them at least three countries as the land of their birth, are employed under double wages in the moldering shops of the Canada Foundry Company.

The men both live and work on the company's property. Eight tents have been thrown up and ten carpenters and mechanics are rushing to completion a one-story building, which is to serve as a dining-room. This will seat 150 people. These living apartments are situated on the northwest side of the Canada Foundry site and adjacent to Davenport road and the C. P. R. railway tracks.

At intervals yesterday delivery wagons from drygoods and grocery establishments carried food and bedding to the spot, and a dozen or so persons were busily employed placing bed-ticks, making beds and arranging the eight tents which are to act as dormitories for the 40 molders who have flouted the union and gone to work.

Four sturdy policemen patrol the several acres upon which operates the Canada Foundry Company, and since Monday have received strict instructions to arrest any union picket who may be found hanging about. At night this number is increased to eight, whose duty it is to protect from molestation the men in the tents and the company's plant at the cost of lives if necessary.

Pickets from the union are closely guarded against. They lie in wait for the molders, and, if by any chance these wander from the works, they are surrounded, and by arguments, and sometimes, it is stated, by threats, requested to quit work and stay by the union. Few men, however, have the bravery to venture outside after sunset—not that they have heard of any intention on the part of strike agitators to molest them, but from some unknown fear that something might happen.

Should necessity compel them, they go forth under the full light of day and can then only leave by permission from the authorities a ticket-of-leave. This ticket bears its owner's name, the reason of his leaving the gates, and the time he is to be gone. If he should be detained for much longer than the time indicated by his ticket, inquiry by some one of the officials is made to ascertain if the man has met with any mishap.

Union pickets have been warned to keep clear of the company's premises. Every patrolman has instructions to arrest any man who is caught hanging around. To further protect the "strike breakers" from any violence, twelve are lights have been ranged around the eight tent and dining rooms. Should strike sympathizers intend making an assault by night, the men are protected by the policemen who parade up and down in front of the tents and along the tracks, and Davenport road, where the lights constantly burning is calculated to keep away any intended besiegers. The precaution has not been taken with the building, however, as the lights, in the cover of darkness, a crowd gathered and sent a fusillade of stones and missiles into the fence-enclosed grounds. Windows were broken, but no one injured. Then, too, threats have been heard in the town of Toronto Junction, a mile away, which would lead the authorities to believe that some desperate party might attempt to break in at any time to rout the campers. The tents have been up since the first week in June, but it is only now that things are becoming active.

Made Christians Hostile To the Kisheneff Jews

In amous Leaflet That Was Distributed on the Eve of the Massacre.

London, July 16.—The Times Russian correspondent sent the following principal passages of a leaflet distributed among Kisheneff Christians on the eve of the massacre: "Inamous Jews, not satisfied with the blood of the Saviour, crucified by them, shed the blood of innocent Christians, which they use in their ceremonies. Have you not heard that they crucified a Christian boy at Dubossary and took his blood? This is true, but the authorities have not divided it, in order not to excite us against the infamous drinkers of blood, who ought to have been expelled from Russia long ago. This was similar to what happened in Kieff, when the Jews took the blood of an innocent child and used it for the child on the street." After accusing the Jews of disloyalty, malice and avarice, the leaflet continues: "Had avarice a free hand they would soon

HE PRACTICES "GRIPS"

One Reason Why a Woman Asks Court for Divorce.

Rochester, N. Y., July 16.—A coat of olive green, with a blue trim, and supplemented by bright blue trim, was the last straw that drove Mrs. Irma Renkie to demand a divorce from her husband, E. Smith Renkie, of Eliza. In her complaint of "cruel and inhuman treatment" the wife alleges she is of a hysterical temperament, and that the painting was done with the deliberate attempt to drive her to madness. She alleges she dare not go out of doors, as the sight of the house induces hysteria. She also affirms in her petition that her husband stamps upon her, and constantly burning is calculated to keep away any intended besiegers. The precaution has not been taken with the building, however, as the lights, in the cover of darkness, a crowd gathered and sent a fusillade of stones and missiles into the fence-enclosed grounds. Windows were broken, but no one injured. MUNICIPALITIES WILL CONTROL

Important Provision to New Telephone Company's Bill—Mr. Belcourt Wrathful.

[Special to The Advertiser.]

Ottawa, Ont., July 16.—Another morning's discussion over the Canadian Telephone and Telegraph Company's bill of incorporation in the railway committee resulted in the acceptance of a provision reserving to municipalities control of the entrance of the new company within municipal confines. A bitter attack was made by N. A. Belcourt, of Ottawa, on the stand taken by Toronto's members and the union of municipalities in branding the new project as a spoilation scheme, aimed at the Bell Company. He talked of denouement and wild and charged the Toronto members with a desire to make political capital at the Bell's expense. There was a lot of other in the committee. Notwithstanding Mr. Belcourt's protest the committee practically agreed the insertion of a provision empowering the new company to enter into an agreement with other companies for the transmission of messages, the governor-in-council to be appealed to in case of disputes with regard to rates. Mr. Clarke denied that the clause was applicable to a company which did not want to enter into such an agreement.

CHINA TO OPEN TREATY PORTS

Insistence of U. S. Government Is Successful—Russia Will Not Interfere.

Washington, July 16.—The Manchurian question has been settled satisfactorily to the United States Government. Assurances have been received from the Chinese Government that it will, in the near future, open treaty ports several ports now closed to the world's trade. The Russian Government has conveyed formal assurance to the United States Government that it will, in any way, oppose such opening. While the ports to be opened are not yet specified it is gathered from the communications received that they are Moukden, the principal inland port of Manchuria, and Ta Tung Kao, at the mouth of the Yalu River. The State department is confident of the propriety of the opening, and that it has secured not only for American commerce, but for the commerce of the world at large, a very substantial gain.

It now appears that the meeting of Russian officials at Port Arthur just closed, was but one of the steps, though an important one, which the Russian government had taken in the execution of its purpose to place matters of international administration in Manchuria in such a condition that the Russian Government might be able to trade without causing disturbance or involving the Russian Government in international interests. It already had been represented that much of the friction that had grown out of the United States question was caused by a sort of triple yet independent administration of affairs in Manchuria by the Russian, Japanese and Chinese governments.

The result of the meeting was that one official would not feel bound by the pledges made by another so that foreign nations could not be misled by the promises of the Russian government. The Russian government, a compact and respected, and orders issued from St. Petersburg in compliance with the Russian government's acceptance. Although no set time is mentioned in the promise to open the ports, it is believed that the Russian government will act promptly after Russian evacuation in September.

The employees are retired on pensions at the age of 65 years, if they have been 20 years continuously in the service. No person more than 45 years old who is inexperienced in railroad work will hereafter be taken into the company's service. The Buffalo, Rochester and Pittsburgh declared a semi-annual dividend of 2 per cent on its common stock yesterday, which is an increase of 1/2 per cent over the regular rate.

Pontiff Passes Bad Night; Doctors to Operate Again

His Holiness Celebrates Feast of Carmelite Madonna.

Patient Unable to Eat and in Last Stages of Prostration.

Special Services Held in All Churches of Rome to Intercede for the Pope's Life.

Rome, July 16.—12:25 p.m.—Monsignor Angeli, one of the Pope's private secretaries, has just left the sick room much preoccupied. He said: "I have left the holy father in a sleep which is so deep that it resembles the lethargy of death."

Rome, July 16.—12:40 p.m.—The doctors, after a thorough examination of the patient, have decided that the regathering of pleuritic liquid, although serious, does not constitute immediate danger of dissolution and, therefore, no further operation until the last possible moment.

The faithful day of the Carmelite Madonna, on which Pope Leo had a premonition he would die, has arrived. Early this morning, his Holiness awoke and immediately began repeating prayers to the Madonna, speaking with such fervor that his valet, Centra, hurried from an adjoining room. Pope Leo heard Centra's voice, said: "Oh, Pio; your task is nearly done. Today is the end of the Carmelite Madonna." Struck with the same idea in his mind, the Pope asked for one of his private secretaries, Monsignor Marzani, to have him say mass in the chapel next to his bedroom, with the door between the two apartments open. In the middle of the mass Pope Leo received the communion like one who really saw visions of coming bliss. Special prayers on behalf of his Holiness were offered in all the churches after the celebration of mass today, in commemoration of the festival of the Carmelite Madonna.

The Pontiff's own premonition that his death, if it were to result from his present illness, would occur today was recalled with emotion.

Rome, July 16.—12:50 p.m.—Dr. Lippinetti, who left the Vatican today, received the communion like one who really saw visions of coming bliss. Special prayers on behalf of his Holiness were offered in all the churches after the celebration of mass today, in commemoration of the festival of the Carmelite Madonna.

Radical Measure to Prevent the Use of Vile Language in Public.

The judge said: "It is the duty of the officers to summarize every prisoner, male or female, who begins to abuse the officers and to use profane language when he or she is placed under arrest. This thing has reached a limit, for we are tired of hearing officers tell of the frightful bawling and cursing they have to stand at the hands of prisoners. Besides, people passing on the streets, and oftentimes ladies, are compelled to listen to this vile talk. The judge then gave some negro prisoners who had been cursing three months.
