This irrepressible discussion.

To the Editor of The World.

Sir. With all due deference to your own opinion to the contrary, I think that an open and candid discussion of questions which vitally affect the well-being of mankind in this world, must ultimately result in good, and in the estal-lishment of the truth. At the same time I fully admit the inutility of wasting time over hypothetical questions which are, so far as we can now see, entirely beyond the ken of man to prove or disprove, and which may remain to humanity forever sealed in darkness.

Advice to Consumptions—
On the appearance of the first symptoms—
—as general debility, losse of appetite, pallow and cough—prompt measures for relief should be taken. Consumption is seroful one disease of the lunge:—therefore use the great anti-scrofula, or blood-purifier and strength-restorer—Dr. Pierce's "Golden Medical Discovery" Surerior to cod liver oil as a nutritive, and unsurpassed as a pectoral. For weak lungs, spitting of blood, and kindred affections, it has no equals Sold by druggists the world over. For Dr. Pierce's pamphlet on consumption, send two stamps to World's Dispensary Medical Association, Buffalo, N. Y. to humanity forever sealed in darkness. Among these are the existence of a personal God, and the survival of the personal, conscious ego of man after death. The latter doctrine may possibly be proved some time in the future, provided it is true; but the former is not likely to be proved or disproved. At any rate, to dispute and

waste precious time over such speculative hypotheses is worse than folly. but there are other questions open and debatable, which will no doubt be eventually settled-questions which very materially affect our terrestrial well-being. The critical investigation and open discussion of these must inevitably land us neares the goal of truth, and, therefore, result in good, for it is the truth above everything

which header.
