

The Rev. C. C. McLaurin of Sarnia, spent a few hours with us a short time ago. He expressed himself as delighted with the improvements made in the old school.

Among the books added to the library since our last issue are: *In Dixie*: Times, Geo. D. Roberts; *Poem*, Philip Stewart; *Lake Lyrics*, Rev. W. W. Campbell; *Tecumseh*, Chas. Mair; *Stories of New France*, Miss Macliar; *Life and Letters of F. W. Robertson*; *Infl. of Je. vs.*, Rev. Philip Brooks; *The Crisis of Missions*, Rev. A. T. Pierson; *The Value and Success of Foreign Missions*, Rev. John Liggins; *The Chicago School of Manual Training, Growth, Training, Evolution and Disadv.*

Prince Albert coats are very good in their way. A rich story is told of a certain College man who prides himself upon the length and beauty of this outer garment. Happening, quite recently, in that uncertain weather between the time of overcoat and no overcoat to be invited out to spend the evening, he decided to leave his overcoat at home and make his *Albert* his only care. On his arrival he was pleased to be greeted with that hospitable reception, which, unless overdone, is so pleasant to the guest. After acceding to the request to remove his glove and place his hat upon the rack, he was thinking of the drawing room, when the hostess, thinking our young man very forgetful, asked, "And will you not remove your overcoat, Mr. ———?" It is hard to say which felt more awkward under the circumstances. The story has a moral for all.

The results of the recent Easter examinations have created quite a variety of effects. In one case a certain student received \$20 as the result: some have received words of praise from parents and it is possible that some may have been met with scoldings. In a very few cases promotions have been made and in others degradation in class standing has taken place. We have gone to the trouble to average the results and have found that in the Preparatory 19 took honors, 47 passed and 34 failed; in the First year 24 took honors, 50 passed and 26 failed; in the Second year 17 took honors, 52 passed and 31 failed; in the Third year 20 took honors, 67 passed and 13 per cent. failed; in the Fourth year 56 per cent. took honors and 44 per cent. passed. From this it would seem that the boys in the higher years do better work than those in the lower. The second year is, however, in this regard, an exception.

"Tetraphenyldiamidomethyleneorthophenylene-diamine is obtained when diphenyldiamidomethyleneorthophenylene-diamine is heated at 200° with carbodiphenylimide. — *Chemical Journal*. Exactly. Thanks. We had been under the impression that diphenyldiamidomethyleneorthophenylene-diamine was an illuxyle-
