CURRENT TRADE CONDITIONS.

ONTARIO.

A Western Ontario manufacturer, referring to the lumber market, writes: "Conditions were never brighter in the lumber trade, and the consumption of lumber in Canada and the United States is enormous. This is the almost unanimous opinion of lumbermen, whether manufacturer or dealer. In some quarters there is an inclination to endeavor to prevent prices from going higher, on the ground that a further advance would be likely to check the consumption. That the conditions warrant higher prices, however, can scarcely be disputed. There will not be sufficient white pine lumber to meet the requirements of the market, nor is the log production of the coming winter likely to relieve the situation entirely, as the condition of the labor market renders it almost impossible to secure more than an average crop of logs. Present indications point to a heavy demand and advancing prices during the balance of this year. In the Ottawa Valley good wide strips are bringing \$39 wholesale and are likely to go to \$40 within two weeks. Cutting-up plank also is likely to advance. Norway has come into greater favor and sells readily at \$13 at the mill. A few mills have a moderate stock of mill culls and the lower grades which have not been contracted for, but the entire production of good lumber may be said to have passed out of first hands.

Hardwoods are gaining in strength. Soft elm and maple stocks are more plentiful than other kinds, but red oak, black ash, birch and basswood are scarce and in good demand, with prospects of higher prices in the near future.

QUEBEC AND NEW BRUNSWICK.

Spruce lumber prices have hardened during the past week. There is a heavy demand for spruce boards and South American stock, as well as for British deals. For spruce boards, 6 inches and up wide, \$13 at the mill is being paid, while for deals of fair specification contracts have been placed at an equal to \$38 delivered at British ports, with higher prices for a large percentage of 9 x 3.
