

saved. That the cases of recovery were not general peritoneal infection. He believes these ideas are hoodwink. The proportion of cases of recovery is much larger than many surgeons will admit. Nitrite of amyl will often stimulate the heart and then follow with strychnine. If we can get a "strychnine pulse" then we have a good chance to save the patient.

The meeting adjourned at four o'clock to attend the Garden Party at Government House. The doctors and their wives together with a large number of the lady and gentlemen residents of Charlottetown were hospitably received by Lieut-Governor and Mrs. McIntyre, and enjoyed the sweet music discoursed and refreshments provided. The weather was beautiful and the grounds proved an ideal spot for mutual enjoyment.

(To be concluded in our next issue)
