THE COOK'S FRIEND BAKING POWDER

Popularity still increasing. The public may be induced to make trial of goods that are extensively advertised, but only such as have real merit will continue to be called for. A permanent business can be built up by the use of honest goods only. The COOK'S FRIEND belongs to this class, wherever it becomes known it sells itself, it pays to handle such goods.

CAUTION—No variation from, or addition to, the exact name, "COOK'S FRIEND," is genuine.

Mercantile Summary.

It is stated that the corporation of Coaticook is trying to buy the water works from the private Company owning them.

At St. Martins, N. S., three schooners are in course of construction, and a vessel of 500 tons is also on the stocks.

FRESH HADDOCKS have lately been purchased in Boston, taken to Digby and smoked, and sold in Montreal at a profit.

At a meeting of the Underwriters agents' held in Charlottetown on the 21st ult. it was unanimously agreed not to insure any wooden bridge or its contents erected on the site of the burned bridges.

Up to date there has been laid down, says the Montreal Witness at the new Magog Textile Works, over one thousand cases and castings for the Print works alone, which are imported from Mather & Platt, of Manchester, England.

It is said that between Oso and Verona larger quantities of ties and timber are being taken out than in any previous year. Rathbun & Co. expect to buy 85,000 ties this spring.

THE firm of Malcolm & Co., of Scotland Woollen mills, is giving up business there. They intend to take the machinery to Brantford where they will shortly start in business on a larger scale.

AUTHORITY has been granted to the Farm and Dairy Utensil Company of Brantford to increase its capital from \$50,000 to \$100,000. Presumably, the enterprise is succeeding.

THE cut of lumber on the St. Croix this season is not expected to exceed 40,000,000 feet where the average cut for several past seasons has been near 60,000,000. Lumbermen's wages across the border are very low.

PARTIES in Pictou, N.S., with a capital of \$18,000, have received at Ottawa letters patent to manufacture, operate, and sell a rope-serving machine. The Alma Lumber and ship building company of New Brunswick have deposited the plans of their proposed works.

THE Bell Telephone Company has on exhibition at its office in Montreal two novel electrical inventions for domestic use. The one is an electric button by which all the gas in the house can be lighted at once. The other is called the "Electric Detector." It consists of a wire running all over the house, across doors and windows, up staircases and along halls, which, when touched at any point, rings an alarm in the room of the proprietor, and at the same time indicates the part of the wire which was touched, and lights the gas all over the house.
