

5.5a Payments Pursuant to the Gross Revenue Insurance Plan for the 1991/92 Crop Year

During the 1991/92 crop year, the federal government reduced the producer's share of the Revenue Protection Plan of GRIP premiums by 25% under the Farm Support and Adjustment Measures Program. Therefore, the following formula will be used for the 1991/92 crop year only:

$$A = B * \frac{3}{4}$$

where

- A = government support provided to barley producers through the Gross Revenue Insurance Plan for the crop year
- B = total payout to barley producers from the Gross Revenue Insurance Plan for the crop year

5.6 Repayment of the 1990/91 Western Grain Stabilization Act (WGSA) Overpayment

The repayment of the 1990/91 WGSA overpayment to barley producers is 8.4% of the total amount repaid by all grain producers in that crop year. The repayment of the 1990/91 WGSA overpayment is computed in accordance with the following formula:

$$A = B * 8.4\%$$

where:

- A = the amount of the 1990/91 Western Grain Stabilization Act overpayment repaid by barley producers in that crop year
- B = the total amount of the 1990/91 Western Grain Stabilization Act overpayment repaid by all producers in that crop year
