

TABLE OF CONTENTS

Executive Summary	1
SIGNET Performance.....	2
SIGNET Internetwork Design Milestones.....	2
1. Introduction.....	5
2. Internetwork Interoperability.....	7
2.1 Internet Activities Board Internet Protocol (IP) Standards.....	7
2.2 Treasury Board Information Technology Standards.....	8
2.3 International Standards Organization Standards.....	9
2.4 Subnetwork Interoperability Requirements.....	10
2.5 Support for Existing EAITC Networks / Systems / Applications.....	11
2.6 Support for General Connectivity Off SIGNET.....	11
2.7 Directory Services.....	12
3. Internetwork Performance.....	13
3.1 General.....	13
3.2 Wide Area Subnetwork Performance.....	13
3.3 Local Area Subnetwork Requirements.....	18
3.4 Inter-Regional Link Bandwidth Recommendations (PRELIMINARY).....	18
4. Internetwork Availability.....	19
4.1 Availability Objectives.....	19
4.2 Availability Analysis.....	20
4.3 Impact of the Internetwork Availability on the General Architecture.....	22
4.4 Internetwork Device Repair Rates and Sparing Levels.....	24
5. Internetwork Scalability.....	27
5.1 General.....	27
6. Internetwork Security.....	29
6.1 Background.....	29
6.2 Implications on SIGNET Internetwork.....	29
7. SIGNET Internetwork Architecture - Design.....	33
8. SIGNET Addressing.....	35
8.1 IP Network Addressing.....	35
8.2 IP Subnet Addressing.....	35
8.3 SIGNET Addressing Alternatives.....	36
8.4 Variable Subnet Masking.....	39
8.5 SIGNET Addressing Implementation.....	40
9. SIGNET Internetwork Naming Structure.....	45
9.1 Backbone Naming Architecture.....	45
9.2 Intermediate Systems - (Routers).....	46
9.3 Concentrators.....	48
9.4 Network Equipment.....	49
9.5 Terminal Servers.....	49
9.6 Bridges.....	50
10. Interior Gateway Protocol.....	51
10.1 OSPF Routing Protocol.....	51
10.2 OSPF Backbone/Area Configuration.....	51
10.3 OSPF Link Metric.....	53
10.4 Security.....	55
11. Mission Node Design.....	57
11.1 Electrical Specification.....	58
11.2 Physical Interconnection.....	58
12. Frame Relay subnetwork technology.....	59
