MANUFACTURERS OF

CANADIAN HEMLOCK TANNED LEATHER BELTING

ALSO, SOLE AGENTS FOR

Hoyt's Pure Oak Tanned American Leather Belting

11 JORDAN ST. - TORONTO

My Lever Hoop Cutter

Is an Iron Machine on timbers, capable of cutting from 75 to 100 hoops a minute. Makes the tap while cutting. I also make Pointer, for pointing planks before they are cut. Planer for finishing hoops, and Coiler for coiling, all simple and substantial. Mill owners whose supply of merchantable timber is becoming scarce, will find this set of Machinery a great addition to their business, as it works that useless stuff, SWAMP ELM, into an article, the demand for which is almost unlimited—A BARREL HOOP.
