Wheat Values Up to New Records For the Present Year's Options

Sensational Crop Bamage Advices Responsible for Further Upturn at Chicago-Corn and Oats Relatively Steady.

CHICAGO. Aug. 4.—New investment | Dec., 7s 11/6d. Flour, winter patents, 27s in wheat. Purchasing was based upon belief that reports of serious damage to the crops in Russia had been confirmed and that there was truth also under the stories of black rust in the Canadian northwest.

Closing figures were steady, 3-4 to 7-8 to 1 3-4 to 1 7-8c higher than last night.

Latest trading left corn 3-8 to 5-8 to 3-4 down, cats up 1-8 to 1-4 to 3-8 and provisions at an advance of 5 to 22 1-2

to 25.

Harvest reports received to-day sufficiently verified the supposed disaster to the wheat crop of Russia. One private cable from Odessa declared explicity that the total yield in the country would be three-eighths smaller than last year.

Small Output.

This despatch was interpreted to mean an output not exceeding 483,000,000 bushels, which if true, is a falling off so huge as to radically affalling off so huge as to radically affect prices the world over. During the principal substitute for the Russian variety. Accordingly a sharp rise in durum gave considerable plausibility to the pessimistic crop advices from Russia.

As to black rust, experts now swarming into Canadian territory were in-

At no time did any violent setback interfere with the bulge in this market. It was noticeable, however, that the new buying was almost wholly in the deferred deliveries. During the session September varied from 90 to 91 1-8, and closed 7-8 net higher at 90 5-8.

Liverpool, Aug. 4.—The market opened barely steady ¼d to ¾d higher, being influenced by the strong American cables yesterday and the strength in Buenos Ayres. Following the opening heaviness developed with realizing and prices declined ¾d to ¼d with the undertone easy. Profit-taking was induced by the better reports from India that rains are general, except in the Junjaub, with the outlook for the monsoon improved. Receipts for three days aggregated over 1,000,000 bushels. Australian shipments for the week, 1,172,000 bushels, against 480,000 bushels last week, and predictions are for large world's shipments. These influences served to offset bullish American advices.

Toronto Sugar Market. Further advances were in evidence in all grain prices on the exchanges yesterday, and quotations firmed up in Toronto to a certain extent in consequence. Claims of damage to the growing crops thru black rust in the Canadian west were, if anything, a little more insistent, and as the Winnipeg market was relatively stronger than either the chicago, Duluth or Minneapolis exchanges, the idea gained ground that the dreaded pest had gained a foothold across the international border line.

Bad Reports From Northwest Further Stimulate the Market -Brekers' Comment.

J. P. Bickell & Co. from Logan & Bryan:
Wheat—New prices were made on this movement, northwest markets leading in the upward turn. Bull factors were the continued bad reports from northwest, confirmation of bullish advices from Russia and uncertainty in regard to the Canadian crop. Country offerings much lighter.

Canadian crop. Country offerings much lighter.

Finley Barrell wires:

Wheat—Under the influence of broadening trade, additional rust claims in Canada and sensational Russian crop estimates, market after making a rather weak start, firmed, and scored a substantial advance. With the exception of reported improvement in cash demand in Kansas City there was very little doing in either cash or export circles. The claims of black rust in Canada, altho again denied, were backed up by vigorous buying at Winnipes, which led the American markets. While we can see nothing in the situation to warrant changing our position, we feel that in view of the recent advance one should exercise caution in increasing long lifes on swells from this level, as short interest has been well eliminated, and long interest materially increased. The immediate course of the market in our opinion will depend largely on the Canadian northwest, for the reason that all eyes are now focused upon Canada.

Erickson Perkins & Co. had the following:

Erickson Perkins & Co. had the following:

Wheat—Market opened lower, but turned strong and continued so. The news was most insistent regarding rust damage. Winnipeg was strong, and there is good reason to believe that rust damage is extending to Canada. It seems evident that the rust damage is serious enough to have a firm effect, and this, with the strong conditions abroad, will result in higher prices.

Corn—Market quiet to-day and trade light with liquidation by recent buyers. Weather conditions favorable. Cash demand fair for shipment, and the movement showed no material increase. There is talk of heavy offerings of new corn for November and December shipment, and we think this has considerable market effect. We place no reliance upon such reported offerings being indicative of crop conditions. We continue to feel more than friendly to the long side and to-day's setback is only natural.

Oats—Market firm early, easing later. Eastern buyers holding off, and we look for a better cash demand. We feel friendly to the long side.

Montreal Grain Prices.

Montreal Grain Prices.

Montreal, Aug. 4.—Business in Manitoba spring wheat for export account was dull owing to the fact that foreign buyers show no disposition as yet to follow our advance, as the prices bid were from 3c to 5c per bushel below cost. A fair local trade was done in oats at fair prices. The demand from foreign buyers for spring wheat flour was good and sales amounting to 10,000 sacks were made at an advance of 15c per barrel over previous bids for August-September shipment, and bids for considerable more were received and refused. The local market is very firm in tone with a fair volume of business passing.
