

JUNE.

NOTES OF THE MONTH.

JUNE, from the Latin *Juventus*, young, is the opening of Summer. The 21st is the longest day in the year, when happens the Summer Solstice, and the sun appears to stand still, for it has reached its greatest distance from the equator, and begins to return towards it. Hence the cluster of stars which it then enters has been named *Cancer*, the crab, because this creature walks backwards and sideways, the motion taken by the sun. The fifth is St. Boniface's Day, the 11th St. Barnabas, the 17th St. Albans, the 24th Midsummer Day, or the second quarter-day in the year. The 29th is St. Peter's Day. On the 15th the Nile begins to rise.
