Milestones

THE dear little girl of "yesteryear" is a bride-to-day. Her misty veil, her guard of a hundred fragrant roses, the exquisite purity of her wedding garments make her bewitchingly lovely, but unreal. Even her shining eyes hold something of mystery to-day, as, in silver slippers, she steps from girlhood to womanhood. A little ache of regret tugs at your heart, until suddenly she sees you—you who remember her very first uncertain step on two wobbly little feet long, long ago.

"You darling old thing" and, regardless of propriety and posies, two round young arms are flung about your neck while you become hopelessly entangled with an elusive veil that should not be disarranged, a train that is not to be trodden on, flowers that must not be crushed, and a girl who demands to be kissed. The same dear, impulsive girl of short-frock days, radiantly happy, telling you that she loves the Elgin Watch you sent her, the very best of all while triumphantly the slender wrist is held up for your inspection.

Perfect weather yesterday marked the anniversary of Queen Victoria's birthday. There was an exodus from the city to the many country holiday resorts, while many of those who remained here visited the special holiday attractions in the city. The Great War Veterans' Fair, Seaside Park, Rockwood Park and the baseball games all claimed the attention of large crowds. Fishing, picnicking and all the usual pleasures were indulged in, while the suburban resorts along the Kennebec and St. John rivers were busy scenes with crowds of holiday makers and families moving out for the summer. The day was unmarred by accidents.

The second meeting of the East St. John Community Club was held last evening in the Edith Avenue Hall and consisted of a business session followed by a social gathering. The gathering was a very enthusiastic one.

New York, May 25.—The "drys" have still further tightened their stranglehold upon the United States. Highly aromatic jags, annexed by thirty-one states, will be an impossibility from now on. Announcement made this U. S. perfume manufacturers will in future be compelled to use a new ingredient which makes perfume impossible as a beverage, has been the cause.
