ST. JOHN STAR.

ST. JOHN, N. B., SEPT. 4, 1901.

STUFFING THE LISTS.

The Star is informed that the revisors in the parish of St. John are adding to the voters' list (on application, of course), the names of some friends of the local government whose only plea is their membership in fishing clubs, and whose share in these properties would not entitle them to a vote. Several specific instances have been brought to the notice of this paper. As there is likely to be an election within a year, it is time the members of the opposition bestirred themselves, so that when the final revision comes the names of swamp voters, illegally placed on the lists, may be struck off. The former of the Rothery lists is still at large.

THE TROUT STREAMS.

The Star some time ago directed attention to the fact that some manufacturers of lumber were doing much to destroy the value of trout streams in this province. An instance was given of one small portable mill that was placed directly over a stream in such a way that all the sawdust went into the stream. As a result of this the fishermen who had enjoyed good sport along the stream in former years found that the trout were forsaking their haunts, being driven out by the sawdust.

The Star is informed that if those in authority looked into this matter they would find that in many places the sawdust is allowed to go from small mills into the streams, driving out the fish. There are fishery wardens whose duty it is supposed to be to protect the fisheries, but that duty is indifferently performed.

Now that the province is making a special effort to attract tourists and sportsmen and the importance of preserving our fisheries is more generally recognized, more attention should be paid to the stocking and protection of the smaller streams and lakes. This is not wholly in the interest of the stranger who comes to us for pleasure. Our own people are fond of sport, and especially of whipping the streams for trout. In the interest of our own people, therefore, more of the streams should be stocked with trout, and the fishery wardens should be instructed to do their duty without fear or favor.

THE APPLE TRADE.

An English journal says the outlook for Canadian apples is exceptionally favorable this season. The apple crop both in England and on the continent is light. Similar reports have been received from New York and most of the New England states. As a result of this it is believed that apples from Canada will find a much better market than usual, and that not only will there be a demand for winter fruit, but carefully selected lots of early and non-keeping varieties will also bring a good price. The English paper concludes its article as follows:—

We do not wish to see the market flooded with fruit to spoil the trade both for English and imported fruit, and we should advise exporters to purchase cautiously and not rush in on speculation. From Messrs. Adams, Son & Co., of Liverpool, we learn that the box package is growing in favor with the trade here, although it was not much appreciated at first, and though it is not advisable that the barrel should be done away with altogether, it is suggested that Canadian exporters might find it to their advantage to put up the best varieties in this fashion in the coming season.

CHICAGO AND THE HOG.

Chicago sustains its reputation for originality. A despatch announces that the city council will be called on to discuss the question, "Shall hogs be used as scavengers for Chicago streets?" A woman has made the suggestion. And this is her plan:—

I propose that the city own and permit to run at large a sufficient number of hogs. These hogs should be branded in order to prevent theft and the brand should also show what wards they belong to. I suggest also that the hogs should be branded with the names of the aldermen of the wards. As soon as the hogs get fat the city should sell them at the stock yards and replace them with hogs that are in poor condition, and in that way produce a revenue. But this is not all. I would supplement the city drove by private hogs. I would ask all who could afford to do so to buy hogs for the consumption of garbage.

Anyone at all familiar with Chicago civic politics can see at once the appropriateness of naming the hogs after the aldermen. There appears to be a suggestion of irony in the observations of this reformer.
