corporation continues making gains in this district and today added enough to its force at the star plant to re the working of two mills double , night and day, from now on, management claims that the enplant will be on full time before

pursuance of its announced plan run all its plants absolutely non-on, the American Tin Plate Co. and permanent jobs, but in every case the application must be made person-ally, and the applicant declare him-selt free from all union control. When asked today what he thought of the

wages.
Simon Burns, president of the Window Glass Workers' Association, proposes an arbitration committee selected from among such men as Archbishop Ireland, Bishop Potter, Seth Low, and others of like prominence, who shall have absolute authority to decide upon terms of settlement. Their decision to be final and accepted by both parties.

None of the steel people here will discuss the matter in any way.

Mr. Shaffer declared tonight that the strike, in spite of the claims of the other side to the contrary, is proceeding satisfactorily, and his association is making such serious inroads on the corporation's business that it will be compelled sooner or later to come to terms. The fact that the corporation is adding to its force dally poration is adding to its force daily does not worry the president, because he believes them to be either unskilled or poor workmen, who will be a drawback rather than a help to their

employers.
Simon Burns, general master work-man of the Knights of Labor, and president of the Window Glass Workers' Association, L. A., 300, has sent an open letter to Chas. M. Schwab, president of the U. S. Steel Corporation, and to President Theodore Shaffer of the Amalgamated Association, submitnt Shaffer says he is satisfie President Shaner says to submit to the arrangement proposfor Mr. Schwab to concur. If he does it may result in the immediate termination of the great strike.

PITTSBURG, Pa., Aug. 29.—Officials of the mills of the U. S. Steel Corporation that were closed by the striking Amalgamated Association said today that they were receiving many appli-Amalgamated Association said today that they were receiving many applications from former employes for work. The announcement that the company would start their mills nonunion, has, the officials believe, caused a weakening in the ranks of the strikers and many are seeking cover. The Amalgamated officials, however, claim

that their ranks are unbroken, and as strong as ever. One of the steel officials said today that a general mistake was being made regarding the time it would take to train inexperienced men and make them capable of operating mill machines. This has been helieved to have been the case so long that few have taken the trouble to prove it otherwise. It is now ble to prove it otherwise. It is now determined, he said, to have new men determined, he said, to have new men placed in positions that will give them a chance to learn the skilled work and many of the men who hold menial positions in the union mills are to be taught skilled work with which they are in a measure familiar through long essociation with the workings of the mills. It is confidently asserted that before many months pass, it will be possible to produce many new men and plenty fo man all plants that are now idle and which union men have refused to take hold of. The strikers say it will take years to accomplish

are being made in the force of non-union men. The strikers claim to have induced six non-union men to desert the Star mills today, and to have shipped them back to Chicago, whence they came. On the other hand, Supt. Pipes of the Star plant, amounced that he is nearly ready to start up the other mills in the plant, and that the men now waiting for the and that the men now waiting for the improvements to be completed are in

of breaking away from the union. President Shafter of the Amaigamated Association said: "Where will they get men to run their plants? If we thought the men could be secured the threat might frighten us. Until we are assured they are forthcoming, we will keep our nerve:"

The latest official declaration from steel sources is that the strike can now be settled only by the men going back to the mills. The position the officials take, it is said, is that the strike is over so far as their dealing with the strikers as a body is concerned. They want workmen for their idle mills and men who want work can have it for the asking at wages paid before the shut down. They may be union men or not, but the union can have no say as to their work or wages.

Simon Burns, president of the Window Glass Workers' Association, proposes an arbitration committee secondary of the failt will be run without interruption. They may be union men or not, but the union can have no say as to their work or wages. In the Painter mills the work is procrew and the mill will be run without interruption. Regarding the rumer that the steel strike would affect the opening of the window glass plants this fall, a prominent manufacturer today said that the structural steel mills have not been stopped at any time and buildings have been carried up without interruption. M. J. Tighe, a report from Chicago says, is engaged with Vice President W. C. Davis in organising a part American the rumer to the companion of the c

new lodge out of the membership of the former lodge.

The American Tin Plate Co. has announced that it will start the Demmler mills of the company on Monday next week. Police protection has been asked for from Mayor Black of Mc-Keesnart

#### MAY BE A CLUF.

BRIDGETOWN, N. S., Aug. 28. Considerable interest was taken in the news item today in the Halifax papers that a woman who had come to Halifax from New Brunswick to visit friends in Halifax had not been heard since her arrival in Halifax. On Monday morning, Aug. 19th, Thomas A. Balcom of Upper Granville, about two miles east of Bridgetown, came into town and told that he saw a man dressed in white early that morning cross the marsh in front of his residence toward the Annapolis river, cross the dyke and disappeared on the other side in the direction of the water. Mr. Balcom's curiosity was oused and he went to the river bank and says that he there saw marks down the bank to the water, but that the mud was so soft it was impossible by human feet or not. This was six o'clock in the morning. Mr. Balcom is a man about 75 years old and bears good reputation for veracity. But in his story, as they thought that falling eyesight, particularly that early in the morning, might be deceptive, and from the fact that no one was reported missing, the incident was forgotten in a few days. Mr. Balcom, however, was so sure of what he ms to have seen, that he has ched the river bank ever since for me clue to the mystery, but so far fhout avail. If there is any pos-ility that the woman mentioned in a paper may have been down, this ty, a search will be instituted.

of This Country.

The colonies, thank heaven! have ceased to be meaningless terms for most Englishmen. We see them as almost Englishmen. We see them as aiready nations, mature and self-conscious for all their youth, following their own ideals and civilizations, but inseparably linked to us by blood and tradition. At home in England we can have no sense of geographical possession. We are a great nation, but our land is a mere incident in our power. But in the colonies wide ambitions are joined literally and directly with wide territories, there is room to move and breathe and expand; and

they can see, growing up in their sight, the paipable evidence of their power. He must be a dull man, indeed, whose spirit is not fired by the consideration of the oldest, most populous, and most mature of our colonies.

Canada has always seemed something apart from the others, with more of the eld European culture, more long-descended, more northern, and so in some ways more akin to ourselves. The stock of her population was drawn from our best. The hardy, thrifty settler who went out to clear the forest ther who went out to clear the forest is a universe away from the treasure-dunter and the speculator.

#### THE CZAR'S TRIP.

COPENHAGEN, Aug. 29—The city is full of Russian detectives in anticipation of the Czar's visit. Two Russians were arrested here last night, and the authorities tried to keep the matter secret.

The rough weather prevailing renders the Czar's arrival before Monday impossible. A liberal demonstration in honor of King Christian has been arranged for Sunday. It promises to be the greatest display of its kind witnessed here in many years. Delegations from all sections of Denmark will pass in review before the palace, after which there will be a great meeting and banquet.
