RECORD CROWD WITNESSED EXCITING SCENE AT ST. STEPHEN

Bad Spill in Fourth Heat of 2.30 Class — Moy the Great Turned Complete Somersault and Driver Bert Lint Injured — Future Queen Went Into Mixup and Was Thrown.

St. Stephen, Sept. 15.—Another record crowd attended the St. Stephen exhibition today and was favored with perfect weather, though in the afternoon a slight shower passed over but did not drive the ball teams from the diamond, or the spectators under cover, though it made the trotting track slippery for the last few heats and a little heavy, the racing was of a pleasing nature with split heats in all three and every heat a real race.

In the 2.30 trot and pace the first heat was won by Moy the Great, that had started in second place, Future Queen started third and finished second; Rogaia F. Keys in sixth position and finished third and then won the next three heats. A very bad spill occurred in the fourth heat of this race. Rogaia Moy the Great and Future Queen were going to the quarter pole all bunched and all going fast. Bert Lint driving Moy the Great, suddenly Mo appeared to shoot upward, turn a complete somersault and fall heavily. Mr. Lint being thrown over the horse's head and lighting on his back. Future Queen with Fred Southard driving was very close behind and went into the mix, up falling heavily with Mr. Southard stretched on the ground close to his fallen horse. Mr. Lint was seen to move but there was no sign of life from either horse or the other man, and from the grand stand it looked like a tragedy. Rogaia was just fast enough ahead to be clear of the mess. Spectators rushed across to lot and when things had been cleared up it was found that neither horse was injured greatly, and that Mr. Southard was practically uninjured. Mr. Lint was badly injured in the left knee and is as yet unable to use that limb. Mr. Hanifan drove Roy Volo in the last heat of the named race in place of Mr. Lint.

Summary.
2.30 Trot and Pace—Purse \$400
Rogaia F. Keys and Mr. Hanifan (Key) 3 1 1 1
Future Queen, Means and Southard, Machias (Southard) 2 3 3 2
Moy the Great, Red Stable, Fort Fairfield, (Lint) 1 2 2 2

Free-for-All.
The racing in the free-for-all was between Roy Volo and Royal McKellar, and the heats were all so well contested that each of the good equines and their popular drivers came in for an equal amount of grand stand applause. The first heat was captured by the big grey, but the others went to the sturdy little Chestnut. Never a mistake was made by either at any stage of the fight, but each appeared to have done his level best fighting each heat from wire to wire, and with never much daylight between them.

Colonel Marque and Hanks Belinfante started but were never featured in the racing after the first half of the first heat.

Time—2:14 1/4; 2:13; 2:15 1/4; 2:17.
In the last two heats the racing was out in second position, due to conditions caused by the rain. In one heat Seldom C's bit broke and the big bay covered a quarter mile without a driver. Mr. Haley dropping gracefully from the sulky seat without injury.

Second Game.

Commercials Won Double Header

Shut Out Perth in the First Game and Won Second by Score of Three to One.

In a double-header on the East End grounds yesterday afternoon the Commercials handed two defeats to the Perth team. The locals made seven runs in the first game and shut out the visitors. While the hitting was light the visitors played ragged ball when men were on bases which is partly responsible for some of the Commercials' scoring. Perth had six errors in the first game and one in the second, while the Commercials played errorless ball in both games. The second game was called in the sixth inning on account of rain with the score 3 to 1. The following are the official scores and summary of the two games:

First Game.
Perth—
Henshaw, r.f. 3 0 0 1 0 0
C. Lewis, c. 3 0 0 1 6 4 0

Clerical Bowling League Formed

Ten Teams Have Entered and Games Will Be Rolled on Victoria Alleys—The Schedule.

The Clerical Bowling League which proved to be a very popular one last year, was re-organized at a meeting held last evening. The following teams comprise the league: Dominion Rubber Systems, Waterbury and Rising, Ltd., Railway Mail Clerks, N. B. Telephone Co., R. P. and W. F. Starr, McClary Mfg. Co., Goodwin's Co., Atlantic Sugar Refinery, S. Hayward Co. and Red Rose Tea. The latter two are new entries taking the places of Vassie and Co. and Scovill Bros, who retired.

The games will all be rolled on the Victoria Alleys and it is probable that three series will be rolled in schedule of two as was the case last year.

Keen interest is being taken in the league and whilst it is the baby member of the bowling fraternity it will undoubtedly prove a very popular one.

A schedule has been drawn for the first two weeks and at a meeting to be held in a few days the completed schedule will be drawn up.

26 Dominion Rub Sys vs Goodwins, 27 Rly Mail Clerks vs N. B. Tel Co., 28 W and R. Ltd. vs McClary's, 29 Sugar Refinery vs S. Hayward Co., 30 Starr's vs. Red Rose Tea, October.

3 W and R. Ltd. vs N. B. Telephone, 4 Rly Mail Clerks vs Don Rabber, 5 Goodwins vs McClary Mfg. Co., 6 Red Rose Tea vs S. Hayward, 7 Starr's vs. Sugar Refinery.

Schr. Mayflower Ready for Race
Boston Fishing Schooner Now at Gloucester, Mass., and Has Been Chosen for International Contest.

The fishing schooner Mayflower has been chosen by the American Fishermen's Race Committee to represent the United States fleet in the International Fishermen's races series off Halifax this fall. Previous to this action, the elimination race was declared off for lack of contest, in view of the fact that the Mayflower and the schooner Elizabeth Howard comprised the only entries, and the committee also ruled that the latter was not eligible under the terms of the international deed of gift. This left the Boston vessel as the only craft available, and the committee adopted the name the Mayflower, which was to be used for the series.

It was to be regretted that there were not more vessels named for the elimination race, entries for which closed last Saturday, but the fact of the matter is that no captain or owner would enter his vessel against the only entries, and consequently, the honor goes to her by default. Gloucester now awaits with interest what action the Halifax committee will take, in view of the fact that the opinion has been frequently expressed there that the Mayflower would be the only persons grata to the owners and captains of the Lunenburg fishing fleet.

The Boston craft is now unloading her second trip at Gloucester, Mass., and then the Mayflower will proceed to Boston to fit out for fresh fishing which branch she will continue until such time as it is necessary for her to haul out to prepare for the international series.

Labor Conference Plans Now Before President Harding
Formal Call for National Unemployment Discussion Will Be Issued Shortly.

Washington, Sept. 15.—Formal call for the national unemployment conference in Washington probably will be issued by President Harding soon after his return from New York, administration officials said tonight. The plans, officials added, have been practically completed and have been sent by wireless to the yacht Mayflower, so that President Harding can discuss them with Mr. Hoover.

Athletic Union For Nova Scotia

Claim Made Where Sister Province Has Two-Thirds of Athletes Required it Should Have Separate Affiliation.

(Halifax Herald)
The annual meeting of the Maritime Provinces Amateur Athletic Union will be held at Amherst, October 14. Announcement to this effect was made a few days ago. In recent years, the annual meetings have been very tame, with but few delegates attending to give their "how and whys." In fact, only two Nova Scotians and one New Brunswick representative have been registered for the annual meeting of the Maritime Provinces' Branch of the Canadian Amateur Athletic Union last fall, which was by no means a representative body. During the year many protests have been registered by disgruntled athletes and the coming meeting is not only for the election of officers but also for the disbanding of the union, which has been granted ones to vent their feelings before those who administer the affairs of the M. P. B. A. A. U. of Canada.

But the one big item for Nova Scotians at the annual meeting is to see that Nova Scotia, which has two-thirds of the athletes registered with the M. P. B. A. A. U. of C. is given at least three representatives in the Union President Covey stated last fall that Nova Scotia had over 300 of the 500 athletes registered in the Maritimes. This being the case, surely the Province should hold the controlling hand. But at the present writing, the M. P. B. A. A. U. of C. is officered by New Brunswickers.

The time is opportune for Nova Scotia Athletic Association, similar to Ontario, Quebec, Alberta and other Provinces who have branches affiliated with the C. A. A. U.

President Covey has done good work in the Maritimes the past few years, although he has had his ups and downs and occupied a position which naturally calls for a few knocks, but it is difficult to handle the affairs of the Union, located in New Brunswick, to see what is going on in Nova Scotia. Nova Scotia should ask the C. A. A. U. for separate affiliation with the M. P. B. A. A. U. as the next few years are expected to be the biggest in the history of athletics in Nova Scotia. A little action on the part of Nova Scotians is badly needed.

LIQUOR FOUND IN LUMBER CAR
Inspectors Made Good Haul at Nerepis Siding—Nine Double Cases of Whiskey.

There promises to be a wonderful demand for lumber on the American market if the shipment seized by Liquor Inspectors Crawford, Thompson and Provincial Thomas Gibbons at Nerepis is any criterion of the stock to be offered the trade.

The inspectors visited a box car on the Nerepis siding early Thursday morning and found artfully concealed amongst the lumber in extra strong boxes, nine double cases of whiskey, a number of them being King George IV. Special. The value of the goods if landed safely in Boston would have been nearly \$5,000.

As to the sun's heat, Kelvin's argument was that we knew of no source at all adequate to supply the existing output of solar energy except secular contraction. Although we did not know definitely of such a source, Rayleigh said we were now compelled to admit it must exist. Some of the stars were radiating energy at some things like 1,000,000 times the rate that the sun does. They ought, according to the contraction theory, to have expanded an appreciable fraction of their total energy in historical times, but no one would maintain that has occurred, and if not there must be some source of supply other than contraction.

If that was admitted, Kelvin's argument based on the sun's heat failed. Modern knowledge of radioactivity seemed to give a firm basis for an estimate of geological time and a calculation from the rate of change in uranium, of which radium is one of the stages. Rayleigh ended by giving the estimate recorded above.

Earth Habitable For Many Years
Crust Will Last for "A Moderate Multiple of a Billion Years."

London, Sept. 15.—"A moderate multiple of 1,000,000,000 years is the possible and probable duration of the earth's crust as suitable for the habitation of human beings, and no other consideration from the side of physics or astronomy afford any estimate of presumption against this estimate."

This was the final conclusion of Lord Rayleigh at the joint session meeting of the British Association today at Edinburgh. In the last generation, he said, Lord Kelvin attempted to set a time limit to the duration of the sun's heat. Kelvin's calculations in regard to the earth's heat has been upset by the discovery of radioactive substances in the earth.

ENDS WITH BROAD SHOULDERS AND BIG NECKS, LEVENE'S IDEA

Coach of Penn Flankmen Considers Position Has Grown Harder in Recent Years—Not Always the Biggest Fellows Make the Best Ends.

By ROSS E. KAUFFMAN.
"Not always the biggest fellows make the best ends," said Izzy Levene, Penn's end tutor, as he was being whisked to the training base at Cape May a few days ago.

"I have seen plenty of six-footers outplayed by smaller men. Do not think that I am against big fellows on the flanks, but what I actually like to see there is a pair of ends with a sild pair of shoulders.

"Those fellows who weigh around 165 or 170 and have good shoulders and strong necks are the ones who can bowl over the rival interference and take care of anything in sight.

"When you get a player of the build of Heinie Miller, Penn's star of a few years ago, or Dex Very, well remembered for the feats he accomplished on State's football teams, you have a man who can go almost anything. Putting an end of their build out of the play is the next thing to the impossible in football.

"In late years the end position has grown much more important than before. I don't think there is another position on the team so much in importance as end. You must not only have men on the two flanks who are capable of breaking up interference, but they must be able to handle the forward passes, size up plays in a hurry and be fast enough to travel with headwork under every punt.

"I don't believe that a man should be a ten-second man when it comes to getting down the field. It's a question of quick starting and then timing your journey down the field. More harm can be done by an end over-running a halfback than if the arriver at the scene too late. Once he gets beyond the back he is out of the play entirely."

Levene, who played end on Penn's great teams of 1906 and 1906, did not weigh more than 155, but was a whale of a performer. He had those broad muscular shoulders that he admires in other players. His flank mate was Hunter Scarlett, who looked after the end candidates last year. Levene was a product of Northeast High School.

Penn's end material looks encouraging this year. So far, Bill Graves, veteran of last year; Carl Erttervaad, who got into the varsity line last year when Captain Bud Hooper was injured; and H. S. Greenwalt, formerly of York High, look the best of the field, but George Sullivan, the third baseman on the varsity nine; Brown, a newcomer from Frederick, Md., High School, and Rumbold, formerly of Towson, N. Y., are fighting hard to break in.

Elverson McMullen, who looked good to Bill Hollenback at end or halfback as a result of his playing at Franklin Field last week, was promoted to the Cape May, squad yesterday. McMullen played an outfield position on Coach Carlin's Penn nine last season. He comes from Marfetta, Pa., and prepped at Conway Hall.

It is End Coach Levene's idea to have at least three sets of ends this fall, believing that by changing from time to time and getting fresh men in the line-up, a team is able to outguess its rivals and also have more active men in the game.

Chinese Battle
Spaghetti Eaters Of New York

New York, Sept. 15.—A Chinese waiter in the Tea Men's Club in 157 Macdonald street found an empty ash barrel in front of his boss' restaurant yesterday afternoon and became so indignant he hauled it into the dining room of Rocca Paterno's restaurant in 125 Macdonald street, loudly proclaiming that Paterno's employees had set it where he found it.

The barrel landed on Paterno's polished floors with a thump and seriously disturbed the consumption of several yards of spaghetti with which a waiter was spawstitching. The waiter immediately was fastening himself to the barrel and carried it to the street to throw it again into Paterno's and met the Italian waiter coming out en masse to see that nothing of the sort happened.

It that was admitted, Kelvin's argument based on the sun's heat failed. Modern knowledge of radioactivity seemed to give a firm basis for an estimate of geological time and a calculation from the rate of change in uranium, of which radium is one of the stages. Rayleigh ended by giving the estimate recorded above.

Joining Of Water Systems Discussed
City Council Talks Over Linking Up East and West Side Mains—Tenders for Painting Opened.

A discussion of the feasibility of linking up the east and west side water services took up most of the time at City Council yesterday morning and will be further considered on Monday morning. Tenders for painting some of the west side sheds were opened and referred to the Commissioner of Harbors and City Engineer. It was decided to do away with the old pumping station at Silver Falls. On motion of Commissioner Thornton, the matter of a civic reception for the officers of the Canadian Navy was left in the hands of the Mayor and Commissioner of Harbors.

Tenders for painting 5 and 6 and the potato sheds at West St. John: Potato, 5 and 6
E. J. Hooney (Chapel) \$435.00
G. H. Clark 477.00
H. J. Sheffield 480.00
James Huey 289.00
James H. Pullen 350.00
J. T. McGowan 475.00
Edw. J. Hattakorn 250.00
John Adams 409.00
Wm. D. McEman 450.00
Henry Bayntun 500.00
Currier, Ferris & Smith 344.00
do 484.00
Geo. H. West 267.55
The tenders were referred to the Commissioners of Harbors and City Engineer for report.

In answer to a question, Commissioner Thornton said the rate per light in Halifax for street lights was \$30 and here it was \$37.5.

Commissioner Jones recommended that the ownership of the Silver Falls be dismantled.—Carried.

Commissioner Jones reported on the proposed linking up of the east and west side water services. The estimated cost was \$27,300. He read a report from F. A. McInnis, which practically condemned the project as not feasible. The commissioner promised to bring down on Monday all the correspondence in connection with this matter and the Council adjourned.

Zeppelin Will Replace The Z R-2
London, Sept. 15.—Reports that the American and British Governments may arrange for the transfer of one of Great Britain's remaining airships to American ownership. The wrecked ZR-2 has received some credence in American official circles here. The American Government some time prior to contracting for the ZR-2 considered the desirability of obtaining one of the former German Zeppelins for experimental and instructional purposes.

German air fighters were turned over to the Allies, Italy, France and England received one each and America none. Great Britain's Zeppelin—the LZ-126—is the largest rigid airship in existence, now that the ZR-2 is gone. The cubic capacity is 2,430,000 feet, or 330,000 feet less than the ZR-2. The length of the LZ-126 is 743 feet, as against 695 feet for the ZR-2.

Seclusion Of Harem More Preferable
Thinks Mistress of Harem Better Than Being Nagging English Woman.

Angora, Sept. 15.—"The seclusion of the harem is best adapted to woman's nature and it is best for the social order that she should be there," declared Mufide Ferid Hanem, the Nationalist novelist and beautiful wife of Ahmed Ferid Bey, ex-minister of finance, to the correspondent in an interview. "The harem grew out of the intelligent understanding of the marriage relation. It represents the wisdom of the East."

"I am a reformed woman's rights advocate," she continued, "I used to yearn for the independence of the American and European woman, but now I believe the mistress of the harem is a superior product to the spendthrift Russian woman, the sentimental Austrian, the nagging English woman and the calculating, self-centred American woman."

"To these women, woman's rights means the right to spend money on foolish fashions, to marry late, and be childless. They live for the store and the theatre. They are responsible for a good deal of factory labor expended in useless directions. They won't work with their hands to make their clothes, their minds are filled with fashions, novels, and candies."

"Men have become their slaves, and you call this western civilization. We Turkish women have had our heads turned by the effort to become like these civilized women, and in doing so some of us have lost our sterling old-fashioned qualities and become a costly, vain, destructive creature like our sisters of the West."

"We Nationalists are in favor of abolishing the theory of polygamy, though in fact it has long since ceased as an institution. But we are sure woman's place is the home, and the best way to keep her there is the harem, which gives her much liberty but not license. We are good housewives, we wear more or less a uniform gown and veil, in the streets, which prevents us being victims to fashion, and at home, if we do not wish to see our husbands we are not obliged to do so. Surely that is liberty enough."

A Portland girl said that she had been shaken by her beau, but it turned out that he had only taken her out to ride in his filly.

Zeppelins for experimental and instructional purposes. German air fighters were turned over to the Allies, Italy, France and England received one each and America none. Great Britain's Zeppelin—the LZ-126—is the largest rigid airship in existence, now that the ZR-2 is gone. The cubic capacity is 2,430,000 feet, or 330,000 feet less than the ZR-2. The length of the LZ-126 is 743 feet, as against 695 feet for the ZR-2.

New York Primary Election Results

Clear-Cut Victory for Republican Coalition Mayoralty Candidate.

New York, Sept. 15.—A clear-cut victory for H. W. Curran, C. C. Lockwood, and Vincent Gilroy, Republican Coalition candidates for the nomination of mayor, controller and president of the board of aldermen, respectively, was indicated by returns at midnight today's primary election. Major Curran would receive a plurality in all the five boroughs. County Judge Reuben L. Haskell, of Kings, "straight Republican," and "wet" candidate for the mayoralty nomination, whom many Republican leaders had expected to carry off the victory with 430 election districts out of a total of 2,733 in the entire city heard from, was running third, with Aldermanic President La Guardia in second place, and former Senator Wm. M. Bennett bringing up the rear.

In the Republican primaries the mayoralty contest was of paramount interest. In the Democratic primaries interest centered in the fight made by J. J. Hines, Tammany leader of the eleventh assembly district, for borough president of Manhattan, against former Senator Julius Miller, the regular organization candidate. The fight of Hines, in fact and effect, was a fight on the leadership of the Tammany chieftain.

At midnight only fragmentary returns have been received, but friends of Mr. Hines, who had surveyed the situation, report that he has been running well. First vote, however, showed a three to one vote in favor of Miller. The final voting in the municipal

Labor Conference Plans Now Before President Harding

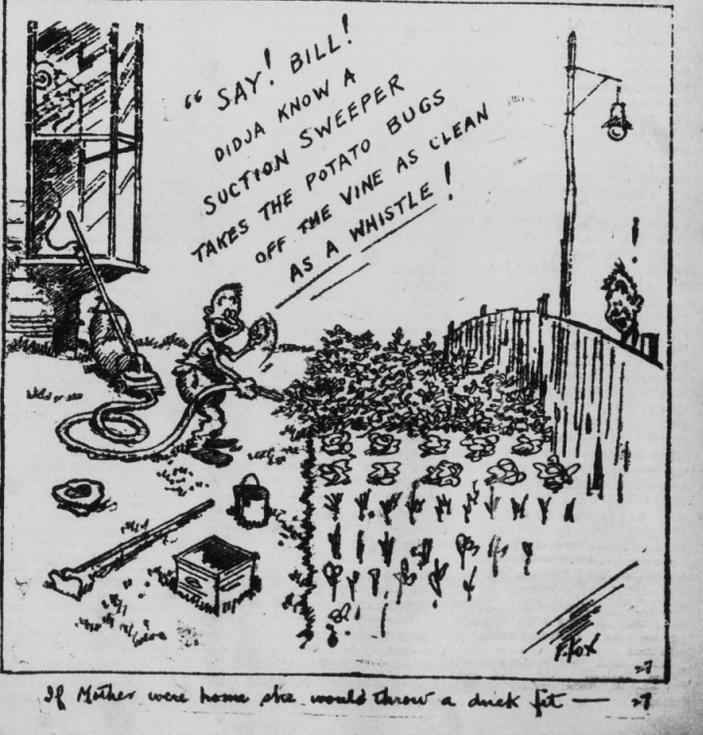

Formal Call for National Unemployment Discussion Will Be Issued Shortly.

Washington, Sept. 15.—Formal call for the national unemployment conference in Washington probably will be issued by President Harding soon after his return from New York, administration officials said tonight. The plans, officials added, have been practically completed and have been sent by wireless to the yacht Mayflower, so that President Harding can discuss them with Mr. Hoover.

A definite date for the conference was said to be still undecided, although September 26 now appeared most probable.

Acceptances are understood to have been received by Secretary Hoover from the thirty conferees who will represent the country at the conference. Among those who will attend it has been indicated, are Samuel Gompers, president of the American Federation of Labor; John L. Lewis, president of the United Mine Workers of America, and Charles M. Schwab, chairman of The Bethlehem Steel Corporation.

elections will take place on Tuesday, November 7, when John F. Hyland, the present Democratic Tammany Mayor, will run for a second term, being opposed by Curran.
