This is millinery season. Millinery open-ings are the order of the day and they are interesting scances. I went to one the other day impelled by my natural curiosity (which often gets me into simi-lar troubles) to see just how the millinery and millinery, looked particularly the mil-liners. I found a choice assortment, that is, of millinery, although now I come to think of it, the remark apply equally well to the milliners. But that is issurity contre-nous, if you know what that means. I heard one of the milliners say it and it sounded so well I have added T to my and now, that he is gone, there's hardly a to che milliners be a minute start to move the store of the went on the store of the milliners with the means of the store of the milliners with the means of heard one of the milliners and the the store shardly at the sounder so well I have added T to make the store to this well I have added T to make the store of the store is hardly a thought, others wise than that of kindly memory. He followed the even tenor of his way, and blived his days in a spirit 'of transparent philosophy: 'He scorned the fretful fever of successful life and wasked only to be left alone. Wilfully harming none of his fellow men and seemingly without en-emies, 'yet his greatest foe was himself. Whatever our attitude toward him during his may have been-the pose which we assumed to amused tolerance or traicious sounded so well I have added it to my vocabulary. But the best part of the show was mil-liners' yarns. I thought they were a lot of drummers when I heard hair a dozen trying to tell different stories all at the some time. But they were prettier. This also applies to both stories and story tell-ers. I saved a few from the wreek of tongues and if you don't like them, put it down to the fact that I heard them all told together and may not have caught the joke of the story. One divine creature, who looked stunning in one of her own millinery creations-that would surely sell to a customer for a Paris importation-started with a story ssumed of amused tolerance or graciou

condescension-, surely we can now dis miss such recollections and consider him only as a man who has lived and died.
