The Farmers' Market

WINNIPEG MARKET LETTER

(Office of The Grain Growers' Grain Company Limited, August 27, 1917)

Very little change developed in the wheat situation since a week ago. The old crop is getting pretty well cleaned up and now daily car receipts and offerings of cash wheat are very small. Terminal elevator stocks are also dwindling, and before there is any real movement of new crop wheat the elevators at the head of the lakes will be almost cleaned out of the 1916-17 crop. A few cars of new crop are coming along and are all of one Northern quality. There is still no announcement from the Board of Grain Supervisors regarding the price of the new crop. There was an unconfirmed report on Saturday that the price had been fixed in the United States at \$2.10 per bushel, but it is not expected that anything definite will be heard in either country for a few more days.

Grain prices showed some strength for a few days with considerable export business worked. On Friday and Saturday there was a lack of support locally and prices declined in sympathy with American corn and oats markets.

Barley offerings are very light and prices show a lower trend.

Flax prices advanced sharply locally and in the American markets where the maximum price of \$3.30 was cancelled. New high levels have been reached and \$4.00 flax in American markets looks quite within the range of possibility.

Cattle, except the real good stock, showed a tendency to work lower. Hogs reached the high point in history on Tuesday and then declined rapidly. Sheep and lambs were on a steady to strong basis most of the week.	Cattle receipts totalled around 20,000, the heaviest week's run of the year to date. With expanding runs at other markets also, prices weakened off, especially on the plainer cattle, which were rated 25 and 35 cents lower for the week. Good to choice western cattle showed little change, and at the end of the week were bringing as much as at the start. Quite a lot of trade in this stuff was done at \$10.00 to \$11.00, including most of the Modena cattle that arrived Monday and some Montana later in the period. Canadians also sold around \$11.00, and one choice lot of them made \$12.00 first of the week. No decent dry fed cattle were offered this week. Most of the native steers went around \$10.00 and \$10.25, and not much got that high because of lack of quality. For the yard run of native beef steers \$7.50 to \$8.00 was enough to get them, while the plain and inferior killers ranged down to \$5.00 and \$5.25, at which many of the cheap little steers ended.
