## **HOLDS THE ROAD AT 50 MILES AN HOUR**

If you have never driven an automobile, the 1915 Maxwell is the car for you. If you have driven cars you will appreciate this automobile. This "wonder car" is driven from the left side, and has but two pedals. The two levers are in the centre. The foot accelerator has a heel rest. The spark and throttle control are under the steering wheel. The front seat is adjustable to your individual leg length.

The Maxwell has real power. The Maxwell is one of the greatest hill climbers in the world. It will throttle down to 4 miles an hour on high gear, and pick up to 50 miles an hour in a comparatively few yards. This means little gear shifting, with less wear on both car and driver.
