

The Pure Milk Dairy Co.

Which Will You Have—

*Pure fresh milk that comes from contented cows,
bottled and delivered to you by the most scientific
and sanitary methods, or*

*Just the ordinary milk picked up from any available
source, and delivered to you in a slipshod manner*

You owe it to your table to insist on milk that carries the endorsement of the city health and medical department. Our new holding process has been approved by city health officials. In installing our new plant we have secured every new sanitary arrangement available.

We are proud of our dairy and invite your inspection.
"Utmost quality and prompt delivery" our motto.
