PLYMOUTH BINDER TWINE

May appear to cost a little more than some other twine, and still be the cheapest in the end.

This Trade Mark is on every Ball of the best Twine made.

It is pretty hard to judge binder twine by the outward appearance of the ball—to know how it will work—whether the interior is free from tow, twist, thick and thin spots, sure to cause frequent breaks, stoppages and vexation in harvest.

There is one way you can always tell and not have to rely entirely on the dealer's judgment or your own, look for our well known trade mark on every ball. If it is there, rest assured you are getting your money's worth.

Plymouth twine is warranted to be perfectly even, strong and unusually long, and is sold as low as consistent with good quality.

Sales Agents in 'most every town
