256-a THE FARM IMPLEMENT CO., LONDON, ONT

**ELEVATOR DITCHING MACHINE
FOR UNDERDRAINING.**

One man with The Elevator Ditching Machine
can do more work than thirty men with spades.
Manufactured by WM. RENNIE, TORONTO.

M. WILSON & CO.,
HAMILTON, ONT.,

Manufacturers of all kinds of

HAY TOOLS.

FOUST'S PATENT HAY LOADER.
ANDERSON'S PATENT RAKE ATTACHMENT.
GRAND RAPIDS HAY TEDDER. WISCONSIN
DEAD LOCK HAY CARRIER AND FORK.

The above cut shows the Foust's Hay Loader with
Anderson's Patent Rake Attachment. It will take
up grain with short straw. It will take up grain as
clean out of the furrow as on the ridge, without the
necessity of using the horse rake. In hay it can be
used after the Tedder, and will take it from the
swath without using a horse rake.

THE 'WARRIOR' MOWER.**REASONS WHY IT IS THE BEST.**

The great many years it has been in successful use
in the field has proved it to be superior in mechanical
construction, lightness of draft, ease of manage-
ment, durability and capacity to do good work
under all circumstances. In claiming a superiority
for the Warrior Mower over others, we would call
special attention to the following points:—
Our Guards are nearer together than those of any
other machine, being only 2 1/4 inches from centre to
centre, which is a very desirable feature for the
following reasons: 1st. It is almost impossible to
stone the knives. 2nd. It renders the guards less
liable to break. 3rd. It takes less power to do the
work, because the grass is more evenly divided, is
collected in smaller bunches, and consequently cuts
easier: and because narrow sections require less
throw to the crank, which is shortened and the work
brought near the power applied. 4th. The finger
bar has a wabbling or rolling motion in its length,
allowing the points of the guards to rise or fall, and
to rise out of the dead furrows or run over the
cradle-knolls with ease. 5th. The driving wheels
are eight inches further apart than in most other
machines, which allows them to run in the track
made for them by the track clearer, and thus avoid
running over the cut crop. 6th. The frame is iron,
so arranged and balanced that it brings no weight
on the horses' necks, and entirely prevents all side
drafts. 7th. We have made a small change in the
Warrior since we commenced its manufacture, mak-
ing the main brace longer, thereby doing away with
the possibility of the horse walking in the grass.
8th. Every machine is run and thoroughly tested
before leaving our factory, and guaranteed to be
made of the very best material, and to do good
work. Write for circular and prices.

**OLIVER CHILLED PLOW and UNION
AGRICULTURAL WORKS.**

Merner, Killer & Co., Props
WATERLOO, ONT.

MANUFACTURERS OF

MOWERS, TWINE BINDERS,
PITT'S HORSE-POWERS,
Mounted and Unmounted.
STRAW CUTTERS, ROOT CUTTERS,
CHOPPING MILLS, GANG PLOWS,
SCUFFLERS, LAND ROLLERS,
SPRING-TOOTH CULTIVATORS,
AND THE GRAIN THRESHER KNOWN AS THE

WATERLOO CHIEF,

OF WHICH WE MAKE A SPECIALTY,

It being the greatest Grain Saver of the age, cleans
the grain fit for the market, saves all kinds of Seeds
such as timothy, etc., and separates them from the
market grain.

The superiority of this machine over all others is
its ease of draft, running fully two horses lighter
than any other machine of same capacity—owing
to the way the machine is geared. Any check given
to the cylinder by bad feeding has only a very
slight effect upon the motion of the other parts.
Simplicity, avoiding continuous delay and stoppage,
only four belts being used, the widest only two
inches. Any farmer, even without experience, will
have less difficulty and less breakage than the most
experienced thresher with other machines. The
cylinder journals have eight inch bearing, all other
journals are in proportion. Will thresh all kinds
of grain equally well, and as a Pea Thresher is
second to none. Before you give your order for
any of the above implements, send for catalogue
and prices. Address

MERNER, KILLER & CO.,
WATERLOO, ONT.
