

How to Cure Rheumatism!

I searched the whole earth for a specific for Rheumatism—something that for any physician could feel safe in prescribing—something that we could count on not only occasionally, but with reasonable certainty. For the ravages of Rheumatism are everywhere and genuine relief is rare.

After twenty years of search and experiment, I learned of the German chemical I now employ, and I knew then that my search and my efforts were well rewarded. For this chemical, in combination with others, gave me the basis of a remedy which in the cure of Rheumatism is practically certain. In many, many tests and difficult cases this prescription has with regularity justified the confidence I had in it.

Mild cases are sometimes reached by a single package—for sale by 40,000 Druggists.

ELMVALE STATION, G.T.R.

QUESTIONS AND ANSWERS. Veterinary.

LEG SWELLS, ETC.

1. Horse's hind legs swell when he
stands in the stable.

2. How much gentian and copperas
make a dose for a horse? Give answer
in teaspoonfuls. J. H. D.

Ans.—1. See answer to question 1 of
J. H. D.

2. About a teaspoonful of each. V.

LAME MARE.

Mare sprained stifle joint on pasture,
and now there is a hard lump in front of
the joint. She goes very lame after
working a day. SUBSCRIBER.

Ans.—This is probably an incurable
case. The proper treatment is to get
it fired and blistered by a veterinarian.
All that you can do is to blister it re-
peatedly. Take 2 drams each biniodide
of mercury and cantharides, and mix 2
ounces vasoline. Clip the hair off the
parts. Tie so that she cannot bite
them. Rub well with the blister daily
for two days; on the third day wash off
and apply sweet oil. Let her in a box
stall now, and oil every day until the
scale comes off and the hair grows.
Blister in this way every month for at
least four or five months. V.

LEUCORRHEA, ETC.

1. Aged mare passes whitish matter
from the vulva almost every day.

2. Which is whole oats or chopped
oats better for a yearling bull? A. D.

Ans.—1. This is leucorrhoea, commonly
called whites, and is very hard to cure.
The womb should be flushed out twice
weekly with about 2 gallons of a two-
per-cent. solution of Zenbleum at 100 de-
grees, Fahr. This must be introduced
into the womb by a veterinarian's in-
jection pump, or a syringe with a long
nozzle. Give her, internally, 30 drops
carbolic acid mixed with a pint of cold
water and sprinkled on her grain three
times daily. Continue treatment until
the discharge ceases.

2. Chopped oats. V.

SPAYING HEIFERS.

Give all particulars for spaying heifers
through the bank. H. G. Y.

Ans.—The heifer is secured with left
side against the side of the stall. The
operator disinfects his hands and in-
struments with an antiseptic, as a five-
per-cent. solution of carbolic acid. The
hair is clipped off the right side between
the point of the hip and the last rib,
and the part disinfected. An incision is
then made from near the point of the hip
running downwards and forwards through
the skin, muscles and abdominal fascia,
sufficiently large to admit the hand,
which is introduced, an ovary se-
cured and removed with a long
eraser, manufactured especially for the
purpose. The other ovary is then re-
moved in the same way; the muscles
stitched with carbolicized catgut sutures,
and the skin with silk sutures. The ani-
mal is kept quiet, and fed lightly until
the wound, which is regularly dressed
with a carbolic lotion, heals. Of course,
it requires some skill and the neces-
sary instruments to operate successfully. V.

INFLUENZA, ETC.

1. Mare took sick. My veterinarian
treated for influenza. She had fever,
loss of appetite, etc., but no cough nor
nasal discharge. The fever abated under
treatment, but she has no ambition, and
is losing flesh.

2. Which is boiled or rolled oats the
better food for colts?

3. Is ground flaxseed, in moderate
quantities, good for colts? W. D. B.

Ans.—1. Your veterinarian was correct
in diagnosis. While we like a free
nasal discharge in these cases, we occa-
sionally meet a case where there is none,
and these cases very often terminate in
serious, and, often, fatal complications.
Your mare requires tonics, and it would
be well to give her a laxative of 1 pint
raw linseed oil. Then take equal parts
sulphate of iron, gentian, ginger and nu-
vomica. Mix, and give a heaped table-
spoonful three times daily. As any
complication may result, and in some it
would be dangerous to give oil, I would
advise you to put the case in charge of
your veterinarian.

2. Rolled or chopped oats are better
than whole.

3. Yes. V.

HAVE YOU A BAD LEG

With Wounds that discharge or otherwise,
perhaps surrounded with inflammation and
swollen that when you press your finger on the
inflamed part it leaves the impression! If an
under the skin you have poison that defies all
the remedies you have tried, which, if not ex-
tracted, you never can recover, but go on suf-
fering till death releases you. Perhaps your
knees are swollen, the joints being ulcerated,
the same with the ankles, round which the
skin may be discolored, or there may be
wounds; the disease, if allowed to continue,
will deprive you of the power to walk. You
may have attended various hospitals and had
medical advice and been told your case is hope-
less, or advised to submit to amputation; but
do not, for I can cure you. I don't say perhaps,
but I will. Because others have failed, it is no
reason I should. Send at once to the Drug
Stores for **ALBERT'S Grasshopper Ointment**
and Pills, which is a certain remedy for the
cure of Bad Legs, Housemaid's Knees, Ulcer-
ated Joints, Carbuncles, Poisoned Hands,
Abscesses, Corns and Bunions.

Snake, Mosquito and Insect Bites.
