

## ONE USE FOR A PICKET FENCE

THIS picture shows how one woman used her picket fence to dry the disks from her "bucket bowl" cream separator. She realized the need for using a separator and the work of thoroughly washing a half bushel of disks twice a day, but she did not know that the simple Sharples Dairy Tubular would have saved her that work and given better service, or she never would have let her husband buy a disk machine.

Dairy Tubular bowl, hung below its bearing and fed through the lower end. Our patents prevent imitation, so others still make "bucket bowls" out of date years ago.

The simple, light Sharples Dairy Tubular bowl is easily washed clean in 3 minutes. A few thrusts of the brush does it. Better than spending 15 to 30 minutes washing a "bucket bowl."

## Two Wrongs Don't Make a Right

"Bucket bowl" manufacturers are wrong, in the first place, in using wide mouth, squatty, "bucket bowls" fed through the top. That kind of bowl is not modern. They are wrong, again, in filling their bowls with disks or other contraptions, for such parts do not make a steady, simple, light, easy to clean, durable bowl. These two wrongs don't make "bucket bowl" separators desirable or right.

Anyone can build disk separators cheap, and just as good as the "old original" disk machine. Any dairyman who is willing to endure the inconveniences of a disk or other "bucket bowl" machine, and insist on trying one, should buy one cheap—then he will not lose so much

when he throws it away and replaces it with a Sharples Dairy Tubular.

Disgusted farmers are throwing away "bucket bowl" machines, both new and old, and replacing them with Tubulars. Not a pleasant experience for them. Avoid it by getting a Tubular: The manufacture of Tubulars is one of Canada's leading industries. 1908 sales way ahead of 1907—out of sight of most, if not all, competitors combined. 1909 better yet. Toronto, Ont. Winnipeg, Man.

### Just Write for this Catalogue

Don't imagine this is the ordinary dull-reading catalogue, for it isn't. It is very interesting, very practical, and contains information of real value to anyone interested in reducing his hours of loading-labor. It tells all about our Low, Wide-tire Steel Wheels. Tells about their lightness, strength and durability. Tells why they are so easy on horses. Tells about our strong guarantee. Our different styles of Handy Wagons are also displayed and described in detail. Don't you think it would be wise to have a copy of this catalogue by return mail?

Dominion Wrought Iron Wheel Co., Limited, Orillia, Ontario.

### The "BACON" Seed Drills and Cultivators

The only Rear-Wheel Driven Seed Drill on the market. The feed in the "Bacon" handles seed without bruising or breaking, and seeds evenly to the last seed. Machine instantly converted from a regular seed sower into a hill dropper. Feed Cut prevents waste of seed when turning rows. For sowing Sugar Beets, Parsnips, Radishes, Carrots, Onions, etc., the 1908 model of the "Bacon" is unequalled for strength, lightness, easy running and good work. Write for our complete catalogues.

THE EUREKA PLANTER CO. Limited Woodstock, Ont. 2

## THE WEAKEST PART OF OTHER FENCES IS THE STRONGEST PART OF THE LEADER

Until last year, when the All No. 9 Leader was placed upon the market, the weakest part of a wire fence was the lock. The Leader made it possible for you to procure a fence with the lock the strongest part.

The grip of the Leader is doubly as secure as the ordinary fence lock. The ends are curved in such a manner that the lock

actually interlocks itself. The result is a lock with a double-grip. That means a twice-as-strong fence—the kind hard-thinking farmers, like yourself, will buy. Catalogue free on request. You can establish a money-making

FENCE AGENCY in your locality with our big selling lines of farm and ornamental fence. Write for complete details.
