Friday, March 22nd 1918.

THE SITUATION.

Germany has failed in her first big offensive blow on the Western front. The attack was launched against the British lines for a distance of fifty miles and they stood the test magnificently. The foe penetrated at some points, but his objective was in no case achieved. Attack after attack took place in large masses and Field Marshal Haig reports the losses of the enemy to have been "exceptionally heavy."

Whether or no this is the commencement of a big general offensive is not yet certain, but it is undoubted that the assault was planned on a larger scale than anything thus far attempted on the Western front. It is significant that the Kaiser in a telegram sent yesterday to the Rhenish Provincial Council made the statement:

"We are at the decisive moment of the war and one of the greatest moments in German history."

He followed by predicting victory for his troops, but it will not come. The Allies are going to withstand all shocks and in the end record a triumph, but not before the struggle has assumed desperate proportions never before known in the history of the world.

Yesterday British monitors bombarded Ostend, the German submarine base, and results are stated to have been satisfactory. Enemy mine sweepers were also shelled in the Heligoland Bight. The sinking of two enemy destroyers and two torpedo boats off Dunkirk also adds to the story of awakened activity.

The French successfully repulsed attacks in the Lorraine and Verdun sectors.

General Allenby reports a still further advance in Palestine.

It is reported that signs of great unrest are commencing to exhibit themselves in the Austrian navy and army.

ONTARIO HOUSE.

The Ontario House has closed the business of the session in the short period of six weeks. Legislative changes were carried out in a terse and business-like way, and the record of the Administration, financial and otherwise, has been shown to be maintained at the same high level as that introduced by the late Sir James Whitney.

It was decided to give Premier Hearst an advance in his salary, and he was also made the recipient of a pleasing mark of approval on behalf of his followers. His health has lately been none too robust, and it is to be sincerely hoped that the trip accorded him will prove to be very beneficial.

It had been anticipated when the session started that preparations would be in order for a general election, but at the suggestion of the Opposition, it was decided to avoid any contest until a year after the war. Had the Government gone to the polls, there would have been no question whatever as to the emphatic endorsement which would have been pronounced by the people.

In the later stages, a bill was introduced to allow women to sit in the Legislature. It was voted down by members on both sides, and herein the Courier considers that they made a mistake. Having been accorded the right to vote, the fair sex, on all logical grounds, should also have been afforded the opportunity to seek votes in a legislative capacity.

GARDEN SEEDS.

A warning regarding the garden seed situation is given in the Agricultural Gazette of Canada, which anticipates that 1919 will be the year of the greatest scarcity, since home sources of supply may be looked for after that year. It says:

"Canadian farmers and gardeners have no occasion for serious alarm as to seed supplies for the ensuing season. They may suffer considerable inconvenience because of being unable to procure particular varieties, or because of difficulties of transportation in getting their seed supplies. Difficulties in respect to seed supplies are expected to be more pronounced for the planting of 1919. Since the outbreak of the war, repeated intimations have been given through the media of press articles, and otherwise, that farmers and gardeners should carefully preserve a supply of the best specimens of field and garden roots, and transplant them early in the spring to produce seeds for themselves and to spare for their locality. Unfortunately, this has been done to a very limited extent, and is not apt to be done by many farmers or gardeners

during the ensuing season. The larger efforts now being made by the experimental farms branch and the Province of British Columbia are expected to yield a seed supply sufficient to guard against a shortage for the spring of 1920.

COMING TO BRANTFORD

(Woodstock Sentinel-Free Press.)
The many friends of John Bauslaugh will regret to learn that he is leaving Woodstock. Mr. Bauslaugh came to Woodstock from Brantford some eighteen years ago as manager of the Woodstock branch of the John Agnew Co., Ltd., boot and shoe store, which position he has held ever since. Some time ago Mr. Bauslaugh was appointed vice-president of the company and is now going to Brantford where the head office is located, to take charge of the business. Mr. Bauslaugh has for the past five years occupied a position on the Board of Education, and in January last was elected chairman. He is a grandson of the late Oliver Blake, who sat in the House of Commons as a Reformer in 1892 and 1893, and represents what was then known as the Thames division, which comprised what is now the Counties of Norfolk and South Oxford. Mr. Bauslaugh will lead Woodstock to assume his new duties about the first of next month, but his family will remain here until early in the summer. He is succeeded in the management of the Woodstock branch by P. Mayland, who has been connected with the London branch of the John Agnew Co., Ltd., for some time.

ONTARIO PREMIER

Receives a Purse of \$1,000 and Trip Tickets

His Future Salary to be \$12,000.

Toronto, March 22.—Sir William Hearst was the recipient of two practical expressions of appreciation yesterday, one from the members of the Legislature as a whole, and the other from his own supporters in the House. At noon the Conservative members invaded the Prime Minister into the smoking-room, where they presented him with tickets to Porto Rico and return for himself and Lady Hearst, and a purse of \$1,000 to make his trip a pleasant one. The presentations were accompanied by an ultimatum from the members that Sir William was to leave Toronto a week hence and have a real holiday.

Increase in Salary.
In the House in the afternoon Hon. W. McGarry moved a resolution increasing the salary of the Prime Minister from \$9,000 to \$12,000. The Treasurer in presenting it stated that Sir William had been opposed to the increase, but that the members of the House felt that he should have it. Mr. McGarry paid a warm tribute to the Prime Minister's unselfish devotion to duty, and emphasized the importance of the position. There was only one protest, and that came from Allan Studholme, the Labor member. Mr. Studholme opposed the increase solely on the ground that the people should have a voice in the matter.

Mr. Proudfoot, the Liberal leader, expressed regret that there was one criticism of the increase. He pointed out the fact that the chairman of the Hydro-Electric Commission drew a salary of \$12,000 a year, and expressed his conviction that the services of the Prime Minister were of great value to the province as those of the Hydro chairman.

"I object to placing the Prime Minister in the position of accepting an increase that any member objects to. The members of the House are not doing this as a matter of charity. They are doing it because they believe, as I believe, that he is entitled to a salary of that amount and for no other reason." Mr. Proudfoot seconded the resolution.

J. A. Pinard, of East Ottawa, supported the resolution. He did so because the position was worth it.

TAKING INVENTORY.
New York, March 22.—A force of clerks, working under a naval authority, to-day began an inventory of the forty Dutch ships in New York harbor, taken over yesterday by the United States. Officers of the steamers co-operated in the work. Until the inventories are filed, formal transfer of the ships cannot take place.

The work will be completed soon. It was said, and the next step will be to overhaul the craft and mount guns. The vessels are now in charge of 350 navy officers and blue jackets and a detail from the custom house.

STOCK MARKETS.
Kemper, Mathes & Co., 140 Dalhousie St., quotes New York stocks, 1 p.m. Railroads: B. & O. 54; C. & O. 58; Can. Pac. 137 3/4; Erie 15 3/4; Erie, pfd., 29 1/2; Mo. Business Men of Hamilton Here

Athletic and Social Afternoon Held at Y.M.C.A. Yesterday

The Hamilton business men, 25 strong, visited the Brantford Y.M.C.A. last evening, playing the locals at basketball. The results of the games were:—

Volley Ball.—First game, 11-3 favor Brantford; second game, 11-3 favor Hamilton; third game, 11-4 favor Brantford; fourth game, 11-10 favor Hamilton.

Basketball Rotarians.—Hamilton 18, Brantford 8-2. First teams, 25-18 favor Brantford; second teams, 16-6 favor Hamilton; heavyweights, 11-3 favor Hamilton.

Bowling.—Brantford 636; Hamilton 580; Brantford 648, Hamilton, 681.

The totals resulted in a tie of five games for each team. The total attendance was 65.

At the conclusion of the games the wives of the Brantford business men served a very appetizing supper and to show their appreciation the Brantford men collected a tidy little sum of money to help the Brantford Y.W.C.A. in their recent affliction.

It is the intention of the officers of the Brantford Business Men's Class to turn over any surplus that is in the treasury for the same good cause.

Stories were told by Guy Long and Rev. Mr. Logan. Speeches were made by W. D. Christanson and W. S. Brewster.

Catarhal Deafness Cannot be Cured by Local Applications, as they cannot reach the diseased portion of the ear. There is only one way to cure catarhal deafness, and that is by a constitutional remedy. Catarhal Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube is inflamed you have a rumbling sound or imperfect hearing, and when it is entirely closed, Deafness is the result. Unless the inflammation can be reduced and this tube restored to its normal condition, hearing will be destroyed forever. Many cases of deafness are caused by catarrh, which is an inflamed condition of the mucous surfaces. HALL'S CATARRH CURE acts thru the blood on the mucous surfaces of the system.

We will give One Hundred Dollars for any case of Catarhal Deafness that cannot be cured by HALL'S CATARRH CURE. Circulars free. All Druggists.

HOW CANADA WON FIGHT AT VIMY

A Lie, That Canadian Soldiers Are a Drunken Lot, Declared Capt. C. S. Oke.

How the Canadians won the glorious victory at Vimy was vividly pictured last night before a large audience in Alexandra Church by Captain, the Rev. C. S. Oke, formerly of the 48th Canadian Battalion recently returned from France. Loud applause was given approving the speaker's statement that "it is a lie that the Canadians in France are a drunken lot."

The Brigade to which Capt. Oke was attached arrived in England on the day of the Battle of Jutland, the 31st of May, 1916. The captain spent eight months in England doing hospital and other work at East Sandringham, Cambridgeshire and Ramsgate. Arriving in France just winter in the midst of very bad weather conditions, Captain Oke found the billeting system in poor condition and was sent to the front a few days later.

For a time he carried on his duties in a village within 10 miles of the first line trenches, and of course within the sound of gunfire. The chaplain's work at the front is something more than having the spiritual oversight of the men. Frequently under great difficulty he holds services on a large or small scale. He buries the dead and keeps a register of the graves. In his work he acts as a first aid man, as a Y. M. C. A. worker, a stretcher bearer and sometimes goes "over the top" with the first men.

"Many people at home have a wrong idea of the religious morale of Canadians in France. There is a deep religious spirit among the men. Surrounded by death on every side, the men are more sober than is thought. The fighting man is not emotional, but a large majority read their Bibles and say their prayers regularly, even under very trying conditions.

Some may come back the worst for their experience, abroad by the majority will be better by the war. Moral conditions in the front line trenches are decidedly better than in England. Here the men are isolated as it were from the outside world. At the front soldiers are very seldom the worst for drink.

Attention was then given to the battle of Vimy Ridge, where the strategy of great generals and the pluck of the sons of Canada won what was perhaps the most spectacular battle of the war. The Germans took Vimy Ridge, a hill four miles in length between Lens and Arras, in 1914 during the advance on Paris.

For weeks the French successive counter-attacks by the French disastrously failed, no permanent occupation being gained. Plans for the great attack were begun in February of last year. The task of taking the Ridge was left to the Canadians.

It is untrue that all the "bad jobs" at the front go to the Colonial troops. Canada has done only her share. On April 9th the attack, the exact time of which confused the unwary Germans, was launched. For weeks previous guns and supplies had been coming up under cover of night. Weather conditions were indeed bad, though the horses suffered more than did the transport men. The "clipping" order last spring is said to be the cause of the death of thousands of horses.

Details of the great battle are known all over the world. How the first wave, the second wave and the third wave of Canadians all obtained their objective successfully. There was some hard fighting, but by the noon of the next day the entire objective, a 4-mile front, was in the hands of the Canadians.

The aftermath in the dressing stations and on the battle field were indescribable. The wounds were many and of a strange character, where escape from death was miraculous.

The Tommy, the rank and file, is the man who is winning the war. It was pitiful to see some of the wounds which, although not serious, were very painful.

The speaker's opinion as to the reason of the victory of Vimy, was simply that the British had outgeneralled the Hun.

For weeks it had been known that the British were going to attack on this front. A change of dates, how-

Margaret Garrett's Husband

By JANE PHELPS.

Chapter XI.

It makes no difference how long I live, how old I get, I never shall forget that night, the first I was ever separated from my husband. At two o'clock I could endure it no longer and called my Tom Langley. A servant answered, and said that Mr. Barton had been suddenly called away on business and had gone almost as soon as he had returned from the country.

"Who is it calling?" the servant asked after her explanation. "Never mind," I said and hung up. I was glad Elsie had not answered. But in my fear for Bob I never thought that had I been in Elsie's place, and some woman who refused to give her name had called Bob at two o'clock in the morning, I should have resented it.

I was absolutely numb with fear when at a little after three, I heard Bob's key in the door, and he came in, a long drawn whistle escaping him as he saw the place lighted.

"Oh, Bob, Bob, where have you been?" I thought you were killed," I cried as I flung myself on his neck.

"For goodness sake, Margaret, what's the matter? Why didn't you stay with your mother as you said you were going to?"

"I knew you would be lonely, and I wanted to surprise you," I sobbed. After this when I am out to bed, I am crying and let's get to bed, and go to sleep like a sensible woman, instead of a silly girl. One would think you were nineteen instead of twenty-nine."

I know that Bob meant nothing by that speech. I know it now, but then it hurt me dreadfully. Would

ever, confused the Germans. Only the large and deep dug-outs saved them from annihilation. The speaker then spoke of the lighter side of the war, and spoke of many incidents where the Tommy had fooled the Hun.

During the evening, Mr. Danby acted as chairman. Mrs. Leeming and Miss Elsie Senn sang very pleasing solos.

Laugh When People Step On Your Feet

Try this yourself then pass it along to others. It works!

Ouch! ? ! ? ! This kind of rough talk will be heard less here in town if people troubled with corns will follow the simple advice of this Cincinnati authority, who claims that a few drops of a drug called Freezone when applied to a tender, aching corn stops soreness at once, and soon the corn dries up and lifts out without pain.

He says Freezone is an ether compound which dries immediately and never inflames or even irritates the surrounding tissue or skin. A quarter of an ounce of Freezone will cost very little at any drug store, but is sufficient to remove every hard or soft corn or callus from one's feet. Millions of American women will welcome this announcement since the inauguration of the high heels.

Freezone is an ether compound which dries immediately and never inflames or even irritates the surrounding tissue or skin. A quarter of an ounce of Freezone will cost very little at any drug store, but is sufficient to remove every hard or soft corn or callus from one's feet.
