Almost Impossible—His Whole Body Racked With Pain.

From the Bridgewaffe Laterprises

Mr Ansim Fancy is a well known blackmith living at Baker settlement, a hamlet about ten miles from Bridge water, N. S. Mr Fancy is well known in the locality in which he lives. He is another of the legion whose restoration to health adds to the popularity of Dr. Williams' Pink Pills. Mr Fancy related his story of illness and renewed health to a reporter of the Enterprise as follows:—"During the last winter, owing I suppose to overwork and impure blood. I became very much reduced in flesh and had severe pains in the muscles all over my body. I felt tired all the time, had no appetite, and often felt so low spirited that I wished myself in another world. Some of the time necessity compelled me to undertake a little work in my blackmith's shop, but I was not fit for it, and after doing the job, would have to lie down; indeed I often felt like fainting. I was advised to try Dr. Williams' Pink Pills, and after using a couple of boxe, I felt is decided relief. The pains began to abate, and I felt again as it life were not all drearines. By the time I had used its boxes I was as well as ever, and able to do a hated day's work at the forge without fatigue, and those who know anything about a blacksmith's work, will know what this means. Those who are not well, will make no mistake in looking for health through the medium of Dr. Williams' Pink Pills."

and to give brigotness and the possibility of happiness to civil life. Its success in all these has been so masked as to command the admiration of the civilized world and to gain for itself the appellation of the best governed city on the face of the globe — American Magazins of Civics.

Monuments to Potatoes.

The potato is everybody's friend. So universally is this vegetable cultivated throughout the land that the potato may almost be said to divide with bread the honor of being the "staff of life."

But indispensible as it has become as an article of food for all classes of people, nowhere is its virtue celebrated as in Germany. There they erred slauntes to it. The city of Offenburg was the first to erect a statute of this kind, which was—and is yet standing, though certainly of a unique kind. The upper part consists of a statue of Sir Francis Drake, the English Naval Cammander, who is reversed for laving introduced the plant into Europe. This, as well as the pedestal, is draped with garlands of the potatovine with the full grown tubers intact. On the pedestal are inscriptions to the following seff.et. The first side seets forth that the above figure is that of Sir Francis; the second explains in words of higher praise what a "Liessing the potato has been to mankind", the third record that the statute is the giff of a certain handow the second and large and Visitor.

World's Best Governed City.

The leading and most commendable feature of the management of public affairs is the principle of the sinking fund, which is applied to every enterprise or business in which the municipality is interested. Whatever debts it has are on the sure and safe road to liquidation by the automatic operation of the sinking fund device. By this means the city of Glasgow will, inside of fifty years, furnish free water to its citizens; give them the best electric lights free; electric or water power at cost. allow them to ride on an electric road at the nominal fare of 2 cents for any distance, and furnish to all free the use of a magnificent public library.

The city mfairs are managed by business men. with the same prudence with which they would manage their own affairs; the question of party politic enters into no local election, and it seems to be the object of the municipality to administer the city's finances in a conomical way, to improve the public health in its physical and moral basis, and to give brightness and the possibility of happiness to civil life. Its success in all these has been so marked as to command the admiration of the civilized world and to gain for itself the appointment of the civilized world and to gain for itself the appointment of the civilized world and to gain for itself the appointment of the civilized world and to gain for itself the appointment of the civilized world and to gain for itself the appointment of the civilized world and to gain for itself the appointment of the civilized world and to gain for itself the appointment of the civilized world and to g
